Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Noodle and Doodle is an instructional series that features creating art projects and cooking projects around a specific theme. The show is hosted by Sean, who drives around in a double-decker bus fully equipped with art supplies and a kitchen, all ready for any assignment. The projects encourage parent engagement and often feature families working together to make something for display in the child's home. Sean is accompanied by Doggity, an every-faithful Beagle dog, who transforms into an animated character during interstitial trips to a parallel universe and kitchen full of prank playing animated characters. The art projects typically feature lessons on recycling materials for re-use in making art and always demonstrate that creativity can transform something intended for one purpose into something useful to achieve a completely different goal.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The Pajanimals are a group of four preschool aged puppets who live together in house with their off-screen mother and father. We meet them in the bedroom, a dormitory of sorts, where they show us their nighttime routine of brushing their teeth and having quiet conversation before falling off to sleep. The quiet time, always turns into a discussion that results in a dream-like adventure to solve a problem, such as overcoming shyness, making a new friend, or dealing with a bully. The adventure takes place in several nighttime dream locales where special friends help them work through the socio-emotional problem of the day. Specific approaches to managing the problem are demonstrated and practiced during the adventure, and the children return home confident, getting ample rest for today and facing their issues tomorrow.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Justin Time features and little boy, Justin, who wants very much to master his destiny, have great adventures, and solve problems. He begins with a problem that vexes him and daydreams his way into an adventure that takes him to different places around the world, but also provides him with an experience that helps him solve his problem when he returns home. While on the adventure he is accompanied by Olive, a knowledgeable imaginary playmate, and Squidgy the morphing flying sponge, who provides commentary and comedy along the way. Justin's lessons involve learning, for example, that it takes focus to achieve success, failure can teach what we need to do to succeed next time, or when one path to solve a problem doesn't work, you can find another way to get to your goal. Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>Lazy Town promotes fitness and healthful habits for preschool children. It takes place in an imaginary setting, Lazy Town, and most episodes relate children's eating and fitness habits to problem solving in their "real world." The lead character, Stephanie, guides the audience through the story. She and her best friends, a group of "human" puppets reside in Lazy Town, where her uncle is the Mayor Milford Meanswell. The underground spy and influencer who defines the ethos of Lazy Town is Robbie Rotten, and he is determined to ruin the health and fitness practices of Stephanie and her friends. When the kids get into difficulties with Robbie Rotten, it is Sportacus, gymnast/athlete who comes to the rescue from his home in a spaceship that hovers over earth, prepared to answer to any call for help. The ever-present theme of Lazy Town is to eat "sports candy" which consists of fruits and vegetables, get sufficient sleep, and go outside and engage in a wide range of physical activities, from playing games, holding athletic competitions, to building forts and play structures.</p>

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The REAL WINNING EDGE series is developed to be an educational/ informational (E/I) program for the 13-16 year age group. It is designed to help youth make winning choices in their lives in order to grow to be productive citizens. This series is based on role models who are making pro-social life choices. Emphasis on being honest, loyal, hard working toward productive goals, and treating others as they would like to be treated, are values emphasized by the positive role models in The Real Winning Edge. Education research indicates that, from preadolescence through the teenage years, youth are most influenced by their peers. Their role model preferences switch from parents to the sports and entertainment icons during these years for most. If the peers and the icons promote antisocial standards and nonconformity to guiding principles honored in our society, youth soon adopt behaviors that not only hurt others but hurt themselves. The Real Winning Edge will go a long way in helping youth to develop character, being the best they can be by seeing their peers and the celebrities whom they admire, who themselves have the character to make winning choices.
