Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Justin Time features a little boy, Justin, who wants very much to master his destiny, have great adventures, and solve problems. He begins with a problem that vexes him and daydreams his way into an adventure that takes him to different places around the world, but also provides him with an experience that helps him solve his problem when he returns home. While on the adventure he is accompanied by Olive, a knowledgeable imaginary playmate, and Squidgy the morphing flying sponge, who provides commentary and comedy along the way. Justin's lessons involve learning, for example, that it takes focus to achieve success, failure can teach what we need to do to succeed next time, or when one path to solve a problem doesn't work, you can find another way to get to your goal. Justin is all about self-directed learning from the young child's perspective and imagination. This program airs on the KING 5.1 main digital program stream.

NON-BROADCAST ENHANCEMENT EFFORTS ON KING-DT 5.1 FIRST ALERT SCHOOL NET: More than 100 Washington schools (elementary, jr. high and high school) are now an important part of KING 5's weather reporting. The weather network consists of computerized weather stations located at schools that calculate wind speed, precipitation, temperature, and other basic weather information. These weather stations are on-line with KING 5's weather system and the National Weather Service, and provide the most accurate and current weather information available in Washington State. First Alert School Net reports are included in each KING 5 newscast. The School Net is of great educational benefit as a hands on learning opportunity. In the classroom, students use the weathernet stations to learn about weather metrics and incorporate meteorology into their science curriculum. They can bring weather forecasting to their own neighborhoods.
