Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	In this entertaining weekly half hour program, Mr. Silverman, the well-known Hollywood animal trainer and author, demonstrates how to train dogs and cats with the help of his furry friends either in-home or on location. The visual instructions are an easy way to learn the art of training our four-legged family companions. Also, each week other animal trainers will talk about their experiences with dogs and cats - especially the specific training needed for a film, television program or commercial. We call this segment "Animal Actors." "K9's of OC" is a segment dedicated to helping the pet owner, in their home, to overcome their most troubling issue with their pet. Mr. Silverman demonstrates exactly what is required to eliminate the problem. This is helpful for any household who has a dog and wants to improve obedience. Never heard of a trained cat? Well, Mr. Silverman knows how and will show the audience the art of training such an "untrainable" being in our "Cat Training" segment. Other weekly segments include "Working Dog" and "Advance Behavior" both entertaining and educational. The skills learned in each half hour is not only to improve training skills but will teach young people patience, kindness, responsibility, determination and understanding - all needed in life, as well. DOG AND CAT TRAINING WITH JOEL SILVERMAN will display the "E/I" icon throughout the broadcast and is closed-captioned for the hearing impaired.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>ON THE SPOT adopts a modified question and answer format familiar to broadcast network viewers, including the targeted age. The questions fall under curriculum core areas of knowledge in social studies, science, the arts, civics, and mathematics. The format allows for a wide range of topics and allows topics to be blended, which is a serious asset. The integration of core curriculum areas is a traditional goal in education and while ON THE SPOT doesn't support the deeper integration that would be done in a classroom, the energetic blend is a great example of taking curriculum out of their separate boxes and making them a uniform part of why knowledge can be important. The series also succeeds in modeling all ages, ethnicities, and both genders as successful, knowledgeable individuals. Although there are right and wrong answers, there are right answers from people that every audience member can identify with. This is of too-often misunderstood importance for the targeted 13-16 year-old age. Identifying with a successful representative of your own group is extremely important. But it is also very important to learn respect for those outside your own group---and this series does that very well. Beyond the correct or incorrect answers presented by the series is a follow-up for deeper understanding. A question on evolution will lead to an expanded look at Charles Darwin in the way that touches on the pivotal Galapagos Island visit, and the fact that Darwin was 25 when he made the voyage there. Similarly, a question on government leads to a deeper look at James Madison, the man, and the revelation that he was the primary author of the US Constitution---something worth knowing for the targeted group.</p>

Origination	Network
Days/Times Program Regularly Scheduled	Saturdays 1230-1PM
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.

ON THE SPOT adopts a modified question and answer format familiar to broadcast network viewers, including the targeted age. The questions fall under curriculum core areas of knowledge in social studies, science, the arts, civics, and mathematics. The format allows for a wide range of topics and allows topics to be blended, which is a serious asset. The integration of core curriculum areas is a traditional goal in education and while ON THE SPOT doesn't support the deeper integration that would be done in a classroom, the energetic blend is a great example of taking curriculum out of their separate boxes and making them a uniform part of why knowledge can be important. The series also succeeds in modeling all ages, ethnicities, and both genders as successful, knowledgeable individuals. Although there are right and wrong answers, there are right answers from people that every audience member can identify with. This is of too-often misunderstood importance for the targeted 13-16 year-old age. Identifying with a successful representative of your own group is extremely important. But it is also very important to learn respect for those outside your own group---and this series does that very well. Beyond the correct or incorrect answers presented by the series is a follow-up for deeper understanding. A question on evolution will lead to an expanded look at Charles Darwin in the way that touches on the pivotal Galapagos Island visit, and the fact that Darwin was 25 when he made the voyage there. Similarly, a question on government leads to a deeper look at James Madison, the man, and the revelation that he was the primary author of the US Constitution---something worth knowing for the targeted group.
