Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	For young people today, new information is generally no more than a mouse-click away. Knowledge is readily there for the taking if kids simply know how to appropriately access it and effecively make use of it. The most useful and important things that youngsters can learn center on discovery, analysis and problem-solving-how do kids get the right information and make proper use of it. In an enticing new world filled with excitement, mystery, and danger, "Magi Nation" addresses these vital learning goals. Tony, Edy and Strag along with their human and decidedly non-human colleagues model their successful, and sometimes less than successful, attempts to analyze difficult situations, set appropriate goals, and creatively seek solutions to the dire dilemmas in which they find themselves. Viewers are given the engaging opportunity to not only observe others go through the problem solving cycle, but to make use of their unique knowledge base and burgeoing problem solving skills to address conundrums on their own.
