Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non-cognitive factors for student success.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	"Animal Atlas" is an engaging and informative series. Just as browsing through a good atlas makes information about terrain and natural boundaries accessible and appealing, this program brings information about the natural world of animals to viewers in a non-didactic, entertaining way. Its approach in no way diminishes the learning that takes place when observations lead to conclusions and young minds will draw many conclusions about the natural world shown in this series. These conclusions are consistent with nationally published curriculum goals in the natural sciences. They include concepts such as the functions of animals in an ecosystem (predator/prey relationships, etc.), the elements of animal classification, and the general emphasis on life science.
