Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal trainer Brandon McMillan operates a training facility known as the Lucky Dog Ranch, where his mission is to rescue hard-to-love and untrained dogs and find them homes. The show focuses on exercising responsibility and on developing a sense of appreciation for life and animals. Life lessons are an integral part of the overarching theme of rescuing these animals from death and providing a second chance for life. Following McMillan's investigations into how to retrain these animals to make them welcome members in the homes of families is both educational and inspirational - encouraging this demographic to become sensitive to our own and others' behavior and teaching how we as individuals can make a difference. This program is specifically designed to further the educational and informational needs of children, has educating and informing children as a significant purpose, and otherwise meets the definition of Core Programming as specified in the Commission's rules.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Chronicling the adventures of Dr. Chris Brown, DR. CHRIS PET VET allows viewers unique insight into the life of one of the world's busiest vets and the animals that he treats. For those animals that require specialist services, Dr. Chris calls on his good friend and colleague Dr. Lisa Chimes, who works at a small animal specialist hospital. The show usually consists of three segments, following the doctor as he treats various animals that are in trouble and offering the viewer opportunities to understand the challenges a veterinarian daily faces. The series focuses on how the doctor investigates the individual problem and tries to develop solutions that on the surface would seem confounding to the viewer. As such the show not only offers a view into careers in and responsibility for taking care of pets, but also into problem solving strategies and behaviors. This program is specifically designed to further the educational and informational needs of children, has educating and informing children as a significant purpose, and otherwise meets the definition of Core Programming as specified in the Commission's rules.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Jack Hanna's INTO THE WILD program is based around Jack traveling the world with his friends and family, taking the viewer to his favorite destinations and introducing them to new and amazing creatures each week. Throughout Jack's travels he raises awareness of different cultures, geography and spectacular animals and animal facts, while teaching children the importance of stewardship of our environment through his documented donations to conservation efforts worldwide. The episodic content will certainly further the educational, informational needs of children 13-16 years of age. INTO THE WILD's emphasis on the visual dovetails with the disposition towards visual learning that is evident in children of all ages, but particularly in the early teen years. The program topic is suitable for both the secondary classroom and general audience with content addressing several academic outcomes designated by both state and national life science standards. Shot from a number of photographic perspectives, the viewer is introduced to the biodiversity of the area, how animals are adapted to the environment and the changes humans have imposed on the environment as well as the positive impact of local conservation efforts in the region. While Jack Hanna introduces the habitat and the wildlife, regional guides are given the expert status and the viewer becomes engaged in the natural environment with the same enthusiasm as Jack's family. Combining data-oriented scientific information with concern for the conservation status of wildlife and the environment enforces the educational value and impact of the program.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>Animal Atlas is an entirely appropriate title for this engaging and informative series. Just as browsing through a good atlas makes information about terrain and natural boundaries accessible and appealing, this program brings information about the natural world of animals to viewers in a non-didactic, entertaining way. Its approach in no way diminishes the learning that takes place when observations lead to conclusions and young minds will draw many conclusions about the natural world shown in this series. These conclusions are consistent with nationally published curriculum goals in the natural sciences. They include concepts such as the functions of animals in an ecosystem (predator/prey relationships, etc.), the elements of animal classification, and the general emphasis on life science. The programs consist of original and detailed footage of animals, a narration, and a charming musical score. The fast moving clips of greatly varied species and subspecies allows viewers to compare and contrast structure and functionality of animal physiologies and behaviors. The animal subjects are presented as they move informally and comfortably through their normal activities. There is no heightened or artificial drama in the presentations. The narration is well informed and unobtrusive, allowing for the inevitable learning that comes from wonder and delight. Even after thirty years of televised animal footage, this series presents vignettes that are new and very engaging. This series also presents in a non-exploitive way views of animal behavior and physiology that traditional pedagogical programming might not include. The ability for young people to observe, wonder, and compare is one of the strengths of the series. While the series builds upon and reinforces life science concepts begun at lower levels, the content, the treatment of the content, the presumption of scientific understanding, and particularly the tone and emphasis of the series are most appropriate for secondary schools. General life science concepts in the episodes reviewed are expected to be learned by middle school where many states begin heavy emphasis in life science.</p>

This program will serve the audience in a way that will make a real difference in their lives. It will insert the clear voice of the kid into the adult-dominated media and provide a unique perspective to the news that is not currently available on network television. This is a unique way of doing business in the crowded world of television news. There is no current news programming that features actual kids reporting to other kids on television. There have been shows by adults working with kids but none that a young audience can literally identify with. TKN will fill that void and become the first program in history that will develop the next generation of news viewers. The 101 year old educational publisher will contribute editorial support and script editing to make stories more age appropriate. Weekly Reader Polls will be featured on the program as well as content from their magazines which reach 11 million children. News Scripts will posted on web site to allow teachers to use them to conduct mock newscasts in the classroom. A regular feature each week will come from Children's Pressline, the international news service that has produced stories for the last 25 years to bring the authentic voices of children and teens to opinion leaders, policymakers and the general public.</p>

Program Title	LUCKY DOG
Origination	Network
Days/Times Program Regularly Scheduled	Saturday 8:00am 10.05-12.28
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal trainer Brandon McMillan operates a training facility known as the Lucky Dog Ranch, where his mission is to rescue hard-to-love and untrained dogs and find them homes. The show focuses on exercising responsibility and on developing a sense of appreciation for life and animals. Life lessons are an integral part of the overarching theme of rescuing these animals from death and providing a second chance for life. Following McMillan's investigations into how to retrain these animals to make them welcome members in the homes of families is both educational and inspirational - encouraging this demographic to become sensitive to our own and others' behavior and teaching how we as individuals can make a difference. This program is specifically designed to further the educational and informational needs of children, has educating and informing children as a significant purpose, and otherwise meets the definition of Core Programming as specified in the Commission's rules.

Days/Times Program Regularly Scheduled	Saturday 8:30am 10.05-12.28
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Chronicling the adventures of Dr. Chris Brown, DR. CHRIS PET VET allows viewers unique insight into the life of one of the world's busiest vets and the animals that he treats. For those animals that require specialist services, Dr. Chris calls on his good friend and colleague Dr. Lisa Chimes, who works at a small animal specialist hospital. The show usually consists of three segments, following the doctor as he treats various animals that are in trouble and offering the viewer opportunities to understand the challenges a veterinarian daily faces. The series focuses on how the doctor investigates the individual problem and tries to develop solutions that on the surface would seem confounding to the viewer. As such the show not only offers a view into careers in and responsibility for taking care of pets, but also into problem solving strategies and behaviors. This program is specifically designed to further the educational and informational needs of children, has educating and informing children as a significant purpose, and otherwise meets the definition of Core Programming as specified in the Commission's rules.

Program Title	ANIMAL ATLAS
Origination	Syndicated
Days/Times Program Regularly Scheduled	Sundays 7:00A 10/6/13-12/29/13
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas is an entirely appropriate title for this engaging and informative series. Just as browsing through a good atlas makes information about terrain and natural boundaries accessible and appealing, this program brings information about the natural world of animals to viewers in a non-didactic, entertaining way. Its approach in no way diminishes the learning that takes place when observations lead to conclusions and young minds will draw many conclusions about the natural world shown in this series. These conclusions are consistent with nationally published curriculum goals in the natural sciences. They include concepts such as the functions of animals in an ecosystem (predator/prey relationships, etc.), the elements of animal classification, and the general emphasis on life science. The programs consist of original and detailed footage of animals, a narration, and a charming musical score. The fast moving clips of greatly varied species and subspecies allows viewers to compare and contrast structure and functionality of animal physiologies and behaviors. The animal subjects are presented as they move informally and comfortably through their normal activities. There is no heightened or artificial drama in the presentations. The narration is well informed and unobtrusive, allowing for the inevitable learning that comes from wonder and delight. Even after thirty years of televised animal footage, this series presents vignettes that are new and very engaging. This series also presents in a non-exploitive way views of animal behavior and physiology that traditional pedagogical programming might not include. The ability for young people to observe, wonder, and compare is one of the strengths of the series. While the series builds upon and reinforces life science concepts begun at lower levels, the content, the treatment of the content, the presumption of scientific understanding, and particularly the tone and emphasis of the series are most appropriate for secondary schools. General life science concepts in the episodes reviewed are expected to be learned by middle school where many states begin heavy emphasis in life science.

Program Title	Jack Hanna's INTO THE WILD
Origination	Syndicated
Days/Times Program Regularly Scheduled	Saturdays 7:30A 10/5/13-12/28/13
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Jack Hanna's INTO THE WILD program is based around Jack traveling the world with his friends and family, taking the viewer to his favorite destinations and introducing them to new and amazing creatures each week. Throughout Jack's travels he raises awareness of different cultures, geography and spectacular animals and animal facts, while teaching children the importance of stewardship of our environment through his documented donations to conservation efforts worldwide. The episodic content will certainly further the educational, informational needs of children 13-16 years of age. INTO THE WILD's emphasis on the visual dovetails with the disposition towards visual learning that is evident in children of all ages, but particularly in the early teen years. The program topic is suitable for both the secondary classroom and general audience with content addressing several academic outcomes designated by both state and national life science standards. Shot from a number of photographic perspectives, the viewer is introduced to the biodiversity of the area, how animals are adapted to the environment and the changes humans have imposed on the environment as well as the positive impact of local conservation efforts in the region. While Jack Hanna introduces the habitat and the wildlife, regional guides are given the expert status and the viewer becomes engaged in the natural environment with the same enthusiasm as Jack's family. Combining data-oriented scientific information with concern for the conservation status of wildlife and the environment enforces the educational value and impact of the program.
