Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Chica is a five-year-old "baby" chick who spends her days with her parents in their costume shop, the Coop. The shop's one employee, Kelly, doubles as Chica's nanny and the ensemble is rounded out with Bunji, a large floppy eared rabbit and Stitches, a straw mannequin that sits in the window. Chica's parents were formerly entertainers in the vaudeville tradition and they regale the audience with stories and songs from their theatrical past. They enjoy and indulge Chica, who sometimes acts younger than her age and gets into all kinds of predicaments. Kelly uses fantasy play to transform herself, Chica, Bunji and Stitches into animated characters in another universe, who are struggling with a problem similar to the one Chica experienced in the Coop. Without fail, they find the problem can be solved and they carry that knowledge back to the Coop to use on another day.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Noodle and Doodle is a live-action show hosted by Sean Roach that also blends animation and puppetry into the overall format. Sean drives a double-decker bus into various communities to meet children who have written to him with a problem that they would like to solve using an art and/or a food experience. Sean is accompanied by Noodle, a puppet character and Doodle, a digital character that lives inside a tablet computer, and Doggity, a faithful beagle. Doggity has a mini-show of his own through an animated alter-ego that appears during diversionary segments set in a restaurant kitchen. The show demonstrates how recycled materials can become art and how food, art, and problem solving can be combined to create a fun experience in everyday life. Every episode can be replicated at home with ease by parents and children playing together.

It is set in a magical swamp, featuring an ensemble cast of five characters; unique creatures called Groundlings, and a robot/computer named Stacks. Each episode contains a specific environmental issue in the marsh that the characters must address, with each Groundling approaching the problem in a unique way. Eco, provides guidance for all the groundlings, many times through moral lessons that focus on teamwork, compassion, honesty, caring, and always a reverence for the environment. Usually the character hearing the moral misinterprets or miscalculates how to manage the problem until the show comes to the final resolution, where the group has learned the lesson and reflects upon Eco's words. The Groundlings are rounded out by Maggie, the youngest and most exuberant; Galileo, the engineer type who built Stacks; Mud/Slinger, a creature with two dissimilar heads and two personalities, that considers itself an inventor; and a single antagonist, Hegdish, comes on the scene occasionally, and he is selfish, cynical and less concerned about the environment than the rest of the Groundlings. In the end, though the entire group understands you cannot give up conservation if you want to save Earth's environment.
