Digital Core
Programming

| Question | Response |
|---|----------|
| State the average number of hours of Core Programming per week broadcast by the station on its main program stream | 3.0 |
| State the average number of hours per week of free over-the-air digital video programming broadcast by the station on other than its main program stream | 336.0 |
| State the average number of hours per week of Core Programming broadcast by the station on other than its main program stream. See 47 C.F.R. Section 73.671: | 5.0 |
| Does the Licensee provide information identifying each Core Program aired on its station, including an indication of the target child audience, to publishers of program guides as required by 47 C.F.R. Section 73.673? | Yes |
| Does the Licensee certify that at least 50% of the Core Programming counted toward meeting the additional programming guideline (applied to free video programming aired on other than the main Yes No program stream) did not consist of program episodes that had already aired within the previous seven days either on the station's main program stream or on another of the station's free digital program streams? | Yes |

| Age of Target Child Audience | 13 years to 16 years | |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration Awesome Planet will inspire and educate anyone interested in earth sciences. Our host, Philippe Cousteau, the grandson of legendary Jacques Cousteau, brings boundless energy to every location we visit. From magnificent mountains to violent volcanoes, this program takes an in-depth look at the unique and distinct features on planet Earth. We not only visit gigantic glaciers and behold their beauty but also discover why they formed, and how they shaped our landscape. Geological experts share wisdom with Philippe, as we strive to understand places on earth, inside the earth and above the earth. | |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | <p>This new half-hour weekly series produced for the 13-16 target audience will certainly attract viewers of all ages. Each week our host, Emily Calandrelli will take viewers on incredible journeys through space that will both entertain and educate. Ever wonder what it would be like to live in space or on a different planet? Watch our host try to perform every day responsibilities while floating in zero gravity. Explore the challenges that come along with living on a different planet as our host lives like an astronaut in a Mars-like habitat. We will have episodes on space robotics, commercial tourism, asteroids and our search for life, among others. When appropriate, the host will highlight NASA related programs and internships for young students that are relevant to the content we have shown.</p> |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | What will the world look like in 2050? Where will the advancements in science, technology, engineering and mathematics lead us? Xploration Earth 2050 strives to answer these questions and more with scientists, inventors, science fiction writers and creative thinkers. This half-hour weekly series, produced primarily for the 13-16 year old target audience, will appeal to the whole family. Viewers will be taken on an educational adventure as the show tackles future challenges in everything from the transportation to healthcare to the environment. |

| Age of Target Child Audience | 13 years to 16 years |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Produced primarily for the 13-16 target audience, XPLORATION Weird But True, will inspire and educate audiences of all ages. This series, produced in partnership with National Geographic Kids, is hosted by the brother-sister team of Charlie and Kirby Engleman. Charlie is an ecologist and Kirby is an artist, and they are both National Geographic Junior Explorers. Together, they share a common curiosity to explore and understand the science behind the world and its wildlife. In this series, Charlie and Kirby explore a new topic each week to uncover the "Weird but True" science at play all around us. With a mix of graphics and handmade art, this E/I series is fun, playful and educational. For instance, in the first episode, our hosts are curious to learn about asteroids- and so they set off to explore the biggest meteor crater in the U.S. and meet a real-life meteor hunter. They also try their hand at tracking down space rocks. Along the way, they discover meteor crash sites can turn into quick sand! On XLPORATION Weird but True, Charlie and Kirby inspire teens to question the HOW and WHY behind the way our world works, and encourage them to discover answers to their most curious questions. |

| Age of Target Child Audience | 13 years to 16 years |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Produced primarily for the 13-16 target audience, XPLOATION DIY Sci will inspire and educate audience of all ages. Host, science educator, and leader in the field of professional educational training - Steve Spangler- encourages the discovery of scientific concepts through experiments viewers can do at home. With a fun, relaxed attitude, Steve will take viewers through step-by-step demonstrations of do-it-yourself experiments that amaze but which also relate back to solid principles of science. For instance, Steve Spangler became nationally-known with a video showing him dropping the candy "Mentos" into a bottle of diet soda. It erupts in a geyser of soda. On XPLOATION DIY Sci, Spangler demonstrates the experiment and also explains the science of why, on a molecular level, the soda reacts that way to the candy. |

| Age of Target Child Audience | 13 years to 16 years |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Produced primarily for the 13-16 target audience. Xploration Nature Know Best will inspire and educate audiences of all ages. Host and marine biologist, Danni Washington, exudes energy as she relates how technology all around us was inspired by nature and how modern innovators are continuing with this practice. We will whirl around in airplanes inspired by birds, and in helicopters influenced by the dragonfly, and even jump from a few such vehicles to illustrate how wing-suits were invented based on the flying squirrel! But engineers aren't the only scientists looking toward nature. We will also meet with biologists studying the behavior patterns of ants: architects who design "living buildings"; and roboticists who are making their designs bigger, stronger and faster based on animals. This series will help kids to understand how getting outside and taking a look around can help them make the next great discovery! |

| Origination | Syndicated |
| Days/Times Program Regularly Scheduled | Saturday 9:00am 10/07/17-12/30/17 |
| Total times aired at regularly scheduled time | 13 |
| Length of Program | 30 mins |
| Age of Target Child Audience from | 13 years to 16 years |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Xploration Awesome Planet will inspire and educate anyone interested in earth sciences. Our host, Philippe Cousteau, the grandson of legendary Jacques Cousteau, brings boundless energy to every location we visit. From magnificent mountains to violent volcanoes, this program takes an in-depth look at the unique and distinct features on planet Earth. We not only visit gigantic glaciers and behold their beauty but also discover why they formed, and how they shaped our landscape. Geological experts share wisdom with Philippe, as we strive to understand places on earth, inside the earth and above the earth. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | <p>This new half-hour weekly series produced for the 13-16 target audience will certainly attract viewers of all ages. Each week our host, Emily Calandrelli will take viewers on incredible journeys through space that will both entertain and educate. Ever wonder what it would be like to live in space or on a different planet? Watch our host try to perform every day responsibilities while floating in zero gravity. Explore the challenges that come along with living on a different planet as our host lives like an astronaut in a Mars-like habitat. We will have episodes on space robotics, commercial tourism, asteroids and our search for life, among others. When appropriate, the host will highlight NASA related programs and internships for young students that are relevant to the content we have shown.</p> |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Produced primarily for the 13-16 target audience, XPLOURATION Weird But True, will inspire and educate audiences of all ages. This series, produced in partnership with National Geographic Kids, is hosted by the brother-sister team of Charlie and Kirby Engleman. Charlie is an ecologist and Kirby is an artist, and they are both National Geographic Junior Explorers. Together, they share a common curiosity to explore and understand the science behind the world and its wildlife. In this series, Charlie and Kirby explore a new topic each week to uncover the "Weird but True" science at play all around us. With a mix of graphics and handmade art, this E/I series is fun, playful and educational. For instance, in the first episode, our hosts are curious to learn about asteroids- and so they set off to explore the biggest meteor crater in the U.S. and meet a real-life meteor hunter. They also try their hand at tracking down space rocks. Along the way, they discover meteor crash sites can turn into quick sand! On XLPLORATION Weird but True, Charlie and Kirby inspire teens to question the HOW and WHY behind the way our world works, and encourage them to discover answers to their most curious questions. |

| Origination | Syndicated |
| Days/Times Program Regularly Scheduled | Saturday 11:00am 10/07/17-12/30/17 |
| Total times aired at regularly scheduled time | 13 |
| Length of Program | 30 mins |
| Age of Target Child Audience from | 13 years to 16 years |
| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Produced primarily for the 13-16 target audience, XPLOURATION DIY Sci will inspire and educate audience of all ages. Host, science educator, and leader in the field of professional educational training - Steve Spangler- encourages the discovery of scientific concepts through experiments viewers can do at home. With a fun, relaxed attitude, Steve will take viewers through step-by-step demonstrations of do-it-yourself experiments that amaze but which also relate back to solid principles of science. For instance, Steve Spangler became nationally-known with a video showing him dropping the candy "Mentos" into a bottle of diet soda. It erupts in a geyser of soda. On XPLOURATION DIY Sci, Spangler demonstrates the experiment and also explains the science of why, on a molecular level, the soda reacts that way to the candy. |

| Describe the educational and informational objective of the program and how it meets the definition of Core Programming. | Produced primarily for the 13-16 target audience. Xploration Nature Know Best will inspire and educate audiences of all ages. Host and marine biologist, Danni Washington, exudes energy as she relates how technology all around us was inspired by nature and how modern innovators are continuing with this practice. We will whirl around in airplanes inspired by birds, and in helicopters influenced by the dragonfly, and even jump from a few such vehicles to illustrate how wing-suits were invented based on the flying squirrel! But engineers aren't the only scientists looking toward nature. We will also meet with biologists studying the behavior patterns of ants: architects who design "living buildings"; and roboticists who are making their designs bigger, stronger and faster based on animals. This series will help kids to understand how getting outside and taking a look around can help them make the next great discovery! |
