Include any other comments or information you want the Commission to consider in evaluating your compliance with the Children's Television Act (or use this space for supplemental explanations). This may include information on any other noncore educational and informational programming that you aired this quarter or plan to air during the next quarter, or any existing or proposed non-broadcast efforts that will enhance the educational and informational value of such programming to children. See 47 C.F.R. Section 73.671, NOTES 2 and 3.	During the third quarter, KFDM addressed the educational and informational needs of children through a variety of programming, outreach activities, and sponsorships of local childrens events and fund-raisers. KFDM continued its commitment to children in Southeast Texas as a partner in various fund-raising and community service projects. We have a Health Matters segment and a Medical Mondays on THE MORNING SHOW and a LIVE WELL segment which addresses health issues which sometimes pertain to children. We partnered with TAB in the Okay to Say campaign, trying to erase the stigma of mental illness in society. We included a Color the WX contest in our Hurricane Preparedness program, to further involve children in hurricane awareness and safety. We continue airing public service announcements alerting children to the dangers of texting and driving, Feed America, the dangers of diabetes, car seats, and financial literacy. In addition, we run public service for Boys and Girls Clubs, the YMCA programs, immunizations, hunting safety, sharing, Save Our Children, autism awareness, Make a Wish foundation, the March of Dimes, and other organizations focused on children.

Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Over more than 500 years, tens of millions of patents for products have been issued, but some are lost to history, and most dont achieve the success of, say, the telephone. Hosts Matt Hunter and Jeremy MacPherson dig up some of those of yore to see how the ideas would fare in the modern world. The guys work with a team to examine original blueprints, build prototypes and test the inventions to see how well they work. Some that the hosts want to tackle are a submarine from the late 1500s, a 14th-century machine using wind power to propel a wagon, and a 1950s design combining a Ford Thunderbird with airplane parts to make a flying car. This program will air on the tertiary digital stream (6.3).
