Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Dragonfly TV is a science education television series that meets the educational and informational objectives of the FCC's Children's Programming requirements for children ages 13-16. Dragonfly TV showcases our most eager young scientists in a way that encourages all kids to discover the wonders of science. It's a new approach in science television for kids, because it features ordinary children and their own science investigations. The programs highlight children "doing" projects with real hands-on experience and demonstrates practical applications of mathematics and science. It introduces young viewers to a variety of scientific disciplines and challenges them in critical thinking and problem solving skills, while providing valuable information to reach answers. Whether shooting over moguls on free-ride skis, getting up close and personal with alligators, or cooking up experiments in their own kitchens, the Dragonfly TV kids empower viewers to explore, question, and learn. In each episode, children tell how they pursued their own investigations, communicating the infectious excitement that comes with making their own discoveries. "Dragonfly TV" is closed-captioned for the hearing impaired and displays the "E/I" icon throughout

Age of Target Child Audience		13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas continues its long series life by using technology to consistently improve the essential visual component of the episodes. The high definition video of the arresting animals and animal elements is well used to engage viewers and lead them through a sequence of valued and meaningful insights. One of the series strengths continues to be that it does not just present a list of animal facts but links a wide variety of information into sequences that make knowledge of the animal kingdom both simpler and easier to remember. The interstitial quizzes have become not just summaries of previous information but a lead-in to the next organized sequence of information. The tone of credited narrator Eric Schwartz is perfect for the target group of 13-16 year-olds. It is non-professorial and faux flip-again, ideal for the target mindset of selfconfident adolescence. Yet the vocabulary is rich. It presumes the understanding of the words like "behemoth" and "adaptation" but gives enough context to add that word to young viewers' vocabulary without getting pedantic. Great information in a rich visual context.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Exploration with Jarod Miller brings viewers up close and personal with the most fascinating members of the animal kingdom. Animal Exploration entertains, informs, and inspires viewers as Jarod interacts with creatures in unexpected ways. Jarod's unique perspective on creatures large and small is seen in episodes such as "Need for Speed," in which viewers learn about the fast-paced lives of the animals one might expect, like cheetahs, but also about the world's fastest butterfly, the fastest striking snake, and a bird that bears a striking and deadly resemblance to the velociraptor. Each week's show features a "Did You Know?" segment, enabling viewers to take away something from the show that they can use in their own backyards. Come along with Jarod to the nearest and farthest corners of the globe as well as to your local zoo, as he explores the human/animal interaction in the face of an ever-changing world.
