Not only does the series present geographical and morays about the areas visited, but it aims to enrich children's lives by making them aware of the differences that exist and how enriching those has devoted his life to finding a solution to the evil gene of wickedness. It is an interesting metaphor for pollution. The series shows elements of courage, friendship, and problem solving. Although the concept is far-fetched, it brings enough science concepts to make it plausible. This would be an excellent venue to discuss the issues of pollution in our modern world. Concepts of what is causing pollution and how students can help to solve some of these problems are the issues young people face today. They very often feel powerless and this show's characters give them great role models to try and problem solve the issues of pollution. There are no mixed messages in this series.
