Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	AQUA KIDS, which aired on WUAB's main digital channel throughout the 2nd quarter 2011, is a half-hour weekly series that provides core programming in the area of biology and specifically, the ecosystem related to the ocean, its tributaries and estuaries. Children can learn about the resources of the oceans and how protection of the oceans is necessary to present and future generations. Not only does the show teach biological topics, but it aims to enrich children's lives by making them aware of future generations, the role they play now, and for generations into the future, with the biggest ecosystem on earth - the oceans. Each episode provides information related to a specific topic and gives an educational approach to understand the topic as it relates to the entire ecosystem of the earth. AQUA KIDS uses the technique of near-peer mentors i.e., children to teach other children. Each episode employs these mentors (called Aqua Kids) who ask questions and experience firsthand the experience of the topic. For example, children might feed manatees to experience the graceful, gentle nature of the animal and learn about their biology or dig through piles of silt dredged from the ocean depths to look for shark teeth to understand how shark continually grow new teeth and lose old rows to teeth.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	ANIMAL ATLAS, which aired on WUAB's main digital channel throughout the 2nd quarter 2011, is an entertaining and educational half-hour program that explores the world of animal wildlife, promoting a better understanding of how various animal species live and what they need to survive. With an entertaining narrative, the series combines focused examinations of certain topics such as ANIMAL APPETITES (which explores the various diets of animals along with information about how animals catch and eat their food; how diets determine their lifestyle; etc.); ANIMAL ANTICS (a hilarious look at the crazy physical antics and talents of certain species); ANIMAL BABIES (an intimate look at babies of various species - how they are born, how they are raised and the difficulties & delights of growing up) along with shows which focus solely on certain animals such as elephants, bears and monkeys. In these shows, a thorough and entertaining exploration of the specific animal takes the viewer into that animal's world as we see where it lives, how it eats, how it plays, how the family unit operates and what threatens/supports its survival. ANIMAL ATLAS also promotes responsibility toward wildlife issues by educating the viewer about endangered species and wildlife habitats, as well as informing viewers how to support wildlife conservation.
