| Describe the<br>educational<br>and<br>informational<br>objective of<br>the program<br>and how it<br>meets the<br>definition of<br>Core<br>Programming. | On The Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults pat the age of high school graduation. There are three fundamental educational benefits to this format. First, taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond retrieval. Third, and most important, it addresses what educators call non-cognitive factors for student success. These are factors that can measurably improve student achievement without specifically involvimaterial to be tested. These include self-esteem and frames in which students see learning occurring. By removing information from the academic silos where it is generally taught and moving it, literally, to the nit forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are giving by diverse ethnicities and ages, by both genders, and not by stereotypes of smart people is essent. It means that anyone can own information. The fact that young people will see this on television in a non academic setting is also very important. Whatever the curriculum or information, knowledge becomes the star and is demonstrated by every type of person. This program is specifically designed to further the educational and informational needs of children, has educating and informing children as a significant purpose, and otherwise meets the definition of Core Programming as specified in the Commission's rules. |

Describe the On The Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, educational science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past informational the age of high school graduation. There are three fundamental educational benefits to this format. First, it objective of taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non-cognitive factors for student the program and how it success. These are factors that can measurably improve student achievement without specifically involving meets the material to be tested. These include self-esteem and frames in which students see learning occurring. By definition of removing information from the academic silos where it is generally taught and moving it, literally, to the mall, it forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are Programming. giving by diverse ethnicities and ages, by both genders, and not by stereotypes of smart people is essential. It means that anyone can own information. The fact that young people will see this on television in a nonacademic setting is also very important. Whatever the curriculum or information, knowledge becomes the star and is demonstrated by every type of person. This program is specifically designed to further the educational and informational needs of children, has educating and informing children as a significant purpose, and otherwise meets the definition of Core Programming as specified in the Commission's rules.
