The quiet time, always turns into a discussion that results in a dream-like adventure to solve a problem, such as overcoming shyness, making a new friend, or dealing with a bully. The adventure takes place in several nighttime dream locales where special friends help them work through the socio-emotional problem of the day. Specific approaches to managing the problem are demonstrated and practiced during the adventure, and the children return home confident, getting ample rest for today and facing their issues tomorrow.

With a light-hearted, comic touch, POKO highlights the coping skills and attitudes that will help prepare young viewers for first steps and first friendships. Each season, the series introduces an expanding cast of characters, including Bibi and her magic sticker book, her cat, Cranberry, and a growing world of changes, challenges and chuckles for Poko and his beloved pals. POKO is the creation of a team of writers, educators, broadcasters and moms and dads who see the need in today's television landscape for a series aimed at the earliest audience that promotes emotional intelligence and, most importantly, leaves 'em laughing. Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	It's Academic showcases the brightest students from 81 area high schools - private, parochial, and public inner city and suburban. Using an exciting quiz format, these students compete to answer questions from al areas of the school curriculum: history, literature, geography, science and math. NBC4's Mac McGarry hosts the program. There are questions on music, arts and current events. Through It's Academic, the admiration and respect normally reserved for athletic heroes is extended to high school scholars and this helps create a pro-learning atmosphere in the schools, where academic excellence is encouraged. School systems in the Washington metropolitan area, recognizing that academic competition is a great motivating force, have established It's Academic clubs to extend the benefit of the competition to a far greater number of students than those who actually participate on the television program. It's Academic is targeted to those young people in middle and high school.

Length of Program	30 mins
Age of Target Child Audience from	2 years to 5 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The Pajanimals are a group of four preschool aged puppets who live together in house with their off-screen mother and father. We meet them in the bedroom, a dormitory of sorts, where they show us their nighttime routine of brushing their teeth and having quiet conversation before falling off to sleep. The quiet time, always turns into a discussion that results in a dream-like adventure to solve a problem, such as overcomin shyness, making a new friend, or dealing with a bully. The adventure takes place in several nighttime drear locales where special friends help them work through the socio-emotional problem of the day. Specific approaches to managing the problem are demonstrated and practiced during the adventure, and the children return home confident, getting ample rest for today and facing their issues tomorrow.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Chica is a five-year-old baby chick who spends her days with her parents in their costume shop, the Coop. The shop's one employee, Kelly, doubles as Chica's nanny and the ensemble is rounded out with Bunji, a large floppy eared rabbit and Stitches, a straw mannequin that sits in the window. In each episode Chica develops or encounters a problem that she cannot immediately resolve. Usually her issues involve impulse control, distractibility, judgment, and inter-personal behaviors. She and Kelly usually work on the problem through an adventure, a fantasy transformation to animation, where Bunji and Stiches come alive and join Chica and Kelly for the problem solving process. The core educational content is primarily socio-emotional development, and Chica learns how to express herself properly, think before she acts, and interact with others effectively. She often learns that it takes hard work and practice to become proficient at different skills
