Digital Core  
Programming

Question	Response
State the average number of hours of Core Programming per week broadcast by the station on its main program stream	3.0
State the average number of hours per week of free over-the-air digital video programming broadcast by the station on other than its main program stream	504.0
State the average number of hours per week of Core Programming broadcast by the station on other than its main program stream. See 47 C.F.R. Section 73.671:	9.0
Does the Licensee provide information identifying each Core Program aired on its station, including an indication of the target child audience, to publishers of program guides as required by 47 C.F.R. Section 73.673?	Yes
Does the Licensee certify that at least 50% of the Core Programming counted toward meeting the additional programming guideline (applied to free video programming aired on other than the main Yes No program stream) did not consist of program episodes that had already aired within the previous seven days either on the station's main program stream or on another of the station's free digital program streams?	Yes

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The Real Winning Edge introduces viewers to some of the most incredibly talented young people in America. It is about teenagers who have built character through their struggles with cancer or death of a loved one, or who came face to face with drug abuse and peer pressure without losing their focus on their goal. Through interviews and profiles, these remarkable young people provide honest answers about how they dealt with adversity in their lives. Each half-hour program includes three segments, each segment featuring the personal story of an outstanding young person. The stories are introduced by an all-star team of high profile, professional athletes, and top names from the extreme sports. The Real Winning Edge is regularly scheduled and airs between the hours of 7:00am and 10:00pm. The program is 30 minutes in length, and is identified as an educational and informational show, at the beginning and through each broadcast, and in listings provided to publishers of program guides.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Sports Stars of Tomorrow is a United States nationally-syndicated sports television show about high school and college athletics. The show, which is hosted by legendary broadcaster Pat Summerall, takes its viewers across the country in search of the brightest young stars in sports. The show provides in-depth feature stories about the top prep athletes in the United States. The goal of the program is to get an "off the field" look at the athletes, so they are frequently shown doing things like playing golf, strumming guitars, and studying. The program is regularly scheduled and airs between the hours of 7:00am and 10:00pm. The program is 30 minutes in length, and is identified as an educational and informational show, targeted to 13-16 year olds, at the beginning and through each broadcast, and in listings provided to publishers of program guides.

Program Title	Safari Tracks on D3
Origination	Syndicated
Days/Times Program Regularly Scheduled	Saturday 10:30-11AM
Total times aired at regularly scheduled time	13
Total times aired	
Number of Preemptions	0
Number of Preemptions for other than Breaking News	

Number of Preemptions Rescheduled	
Length of Program	30 mins
Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>Safari Tracks is a program with content grounded in the natural world and delivered using an approach that, while entertaining to a young audience, highlights the informational and educational aspects of the animal kingdom in the given environment of Africa. There is no question that an audience of young people would gain worthwhile information and concepts delivered with an enlightened attitude toward nature and the environment. Viewers receive topic points that help build the ethical decision-making necessary to becoming a citizen of the planet. The program consists of an engaging host, appropriately African, who offers an easygoing, natural look at animals that are exotic outside of the African continent. From the start, the host references terms in his native African language, a valuable acknowledgement of the multicultural world in which today's children must live. The language level for the narration is at a sheltered middle school level. It presumes a vocabulary that is not beyond advanced upper elementary students. The program's references to and explanation of the predator-prey relationship, the endangerment of natural habitat and species by human activity, and the relatively low survival rate of some animals, are an educational frame for the subject matter of individual animal characteristics. There is no inappropriate personification of the animals too often a temptation when presenting material for young people which keeps the material appealing to middle school and above. There is no comedic exploitation of animals in the footage. Neither is there oversimplification of any key concepts. The references, tone, and presentation all hold true to a line that serves its categorization as educational. The series lends itself to respect for the natural world and initiates discussion of issues relating to that world and encourages drawing of conclusions based upon information presented, The program basic content consists of animal footage taken in the wild, a narration, and a score that features engaging regional musical. Musical accents are from more traditional genres but are effective in holding attention to the fast moving video clips. The program is edited with attention to the visual demands of today's young media viewers. There are fast paced segments, attention-supplementing music tracks, and arresting video content, such as a man in an open vehicle fending off an angry ostrich charging at 45 miles per hour. Summary: Target audience for tone, program content, and learning concepts: Middle and high school (ages 12 and above) Not inappropriate for upper elementary grades Content, including predation discussions, might be too strong for primary aged students, although it would not require particular screening or advisories. The footage does not require traditional flagging. General Category of Learning: Life Science Underlying Science Content Standards addressed: Functions in ecosystems Environment and adaptive characteristics Data and comparison of characteristics across species Adaptation of structure and function for survival The program is 30 minutes in length and is identified as educational and informational at the beginning and through each broadcast and in the listings provided to the publishers of program guides.</p>

Program Title	Safari Tracks on D3
Origination	Syndicated
Days/Times Program Regularly Scheduled	Saturday 10:30-11A
Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>Safari Tracks is a program with content grounded in the natural world and delivered using an approach that, while entertaining to a young audience, highlights the informational and educational aspects of the animal kingdom in the given environment of Africa. There is no question that an audience of young people would gain worthwhile information and concepts delivered with an enlightened attitude toward nature and the environment. Viewers receive topic points that help build the ethical decision-making necessary to becoming a citizen of the planet. The program consists of an engaging host, appropriately African, who offers an easygoing, natural look at animals that are exotic outside of the African continent. From the start, the host references terms in his native African language, a valuable acknowledgement of the multicultural world in which todays children must live. The language level for the narration is at a sheltered middle school level. It presumes a vocabulary that is not beyond advanced upper elementary students. The program's references to and explanation of the predator-prey relationship, the endangerment of natural habitat and species by human activity, and the relatively low survival rate of some animals, are an educational frame for the subject matter of individual animal characteristics. There is no inappropriate personification of the animals too often a temptation when presenting material for young people which keeps the material appealing to middle school and above. There is no comedic exploitation of animals in the footage. Neither is there oversimplification of any key concepts. The references, tone, and presentation all hold true to a line that serves its categorization as educational. The series lends itself to respect for the natural world and initiates discussion of issues relating to that world and encourages drawing of conclusions based upon information presented, The program basic content consists of animal footage taken in the wild, a narration, and a score that features engaging regional musical. Musical accents are from more traditional genres but are effective in holding attention to the fast moving video clips. The program is edited with attention to the visual demands of today's young media viewers. There are fast paced segments, attention-supplementing music tracks, and arresting video content, such as a man in an open vehicle fending off an angry ostrich charging at 45 miles per hour. Summary: Target audience for tone, program content, and learning concepts: Middle and high school (ages 12 and above) Not inappropriate for upper elementary grades Content, including predation discussions, might be too strong for primary aged students, although it would not require particular screening or advisories. The footage does not require traditional flagging. General Category of Learning: Life Science Underlying Science Content Standards addressed: Functions in ecosystems Environment and adaptive characteristics Data and comparison of characteristics across species Adaptation of structure and function for survival The program is 30 minutes in length and is identified as educational and informational at the beginning and through each broadcast and in the listings provided to the publishers of program guides.</p>
