As one parent stated, "You can take a simple idea and turn it into something that can help an awful lot of people." The program provides a motivational and inspirational message that empowers audiences of all ages that hard work; dedication and looking beyond ourselves will pay off for everyone. Each segment of The Young Icons delivers an educational and informational message that supports current social, intellectual and emotional aspects of children ages 13 and up. Attributes and advice emphasized by guests instill a grounded balance of priorities, commitment, and perseverance children can apply to their lives.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	(Digital Channel 20.1)ON THE SPOT adopts a modified question and answer format familiar to broadcast network viewers, including the targeted age. The questions fall under curriculum core areas of knowledge in social studies, science, the arts, civics, and mathematics. The format allows for a wide range of topics and allows topics to be blended, which is a serious asset. The integration of core curriculum areas is a traditional goal in education and while ON THE SPOT doesn't support the deeper integration that would be done in a classroom, the energetic blend is a great example of taking curriculum out of their separate boxes and making them a uniform part of why knowledge can be important. The series also succeeds in modeling all ages, ethnicities, and both genders as successful, knowledgeable individuals. Although there are right and wrong answers, there are right answers from people that every audience member can identify with. This is of too-often misunderstood importance for the targeted 13-16 year-old age. Identifying with a successful representative of your own group is extremely important. But it is also very important to learn respect for those outside your own group---and this series does that very well. Beyond the correct or incorrect answers presented by the series is a follow-up for deeper understanding. A question on evolution will lead to an expanded look at Charles Darwin in the way that touches on the pivotal Galapagos Island visit, and the fact that Darwin was 25 when he made the voyage there. Similarly, a question on government leads to a deeper look at James Madison, the man, and the revelation that he was the primary author of the US Constitution-something worth knowing for the targeted group.

The show's major educational goals lie in the all-important psycho-social arena. Largely through targeted modeling, the show aids in the enhancement of viewers' personal character and pro-social behavior. Viewers come to see the value of honesty, integrity, the joy that can come from sharing, and so much more. The show's focus on feelings and emotions gives viewers an opportunity to make gains in their own emotional intelligence. They learn to effectively express themselves and read the expressions of others. The show also provides a template that youngsters can use to face situations and solve problems with the use of courage, inventiveness, and logical reasoning. The series secondarily addresses complementary core-knowledge goals. The show encourages an understanding and appreciation of music, leading to creative development and gains in multiple other subject areas; and provides practice on fundamental knowledge-based learning and skills, including numbers, the alphabet, colors, vocabulary, sequences, and directions. By incorporating the series' multi-faceted educational goal in the context of fun and laughter, Doodlebops Rockin' Road Show furthermore helps to engage kids in new learning, and gives them a chance to hone and develop their burgeoning sense of humor.
