When the dastardly villain Hacker (Lloyd) launches a mad mission to conquer the virtual universe, Motherboard calls upon three earth kids for help. They are Jackie, Matt and Inez - the culturally diverse heroes of CYBERCHASE - who, along with the wise-cracking cyber-bird Digit (Gottfried), travel from their real-world realm to the colorful virtual vistas of cyberspace, where they vanquish the bad guys in an all-out battle of wits. Each episode takes the kids on a thrilling adventure driven by a different math concept - from tackling time in ancient Egyptian tombs to cracking codes in creepy caves or making sense of numbers in a fractured fairy tale world.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The goal of Martha Speaks is to increase oral vocabulary, the words we use when we talk. The shows are not trying to teach kids how to read. They are designed to help kids understand what words mean when they hear them; words like retrieve, sprout, and crave. Vocabulary is one thing that predicts if children will be good readers. Once they are in school and they see these words, children will need to know what they mean. If children have heard the words before, that familiarity will help them as they learn to read. Martha Speaks is designed to teach up to 20 words in each show. And how better to get kids excited about learning and trying out new words than with a talking dog, who just can't stop talking?!

Educationally, Wild Kratts is timely, focusing on science just as educational indicators show an alarming trend of low performance and interest in science in today's children in international comparisons (NSF Indicators 2004). The smart, fun, confident, enthusiastic characters of Wild Kratts provide role models that are culturally diverse to ensure that a wide range of viewers can identify with, and thus learn with, the characters in the show.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	The show presents culture and language learning as fun, relevant and rewarding for all children, with a special emphasis on the Latino population. The show chronicles the adventures, and sometimes misadventures, of fraternal twins Maya and Miguel Santos and features their family, friends and a diverse neighborhood. This show centers on Maya's well-intentioned meddling in her family's and friends' lives, ultimately creating new quandaries to fix. Their mother is from Mexico, and father is from Puerto Rico. The underlying message is the importance of doing good for the family and community, and the philosophy that shared happiness is greater than personal gain. The show presents a positive, culturally rich portrayal of Latino family, language and cultures. Each episode ends with a WordGirl short. Some episodes end with Maya announcing, "Here's what some of our friends are up to," introducing clips of children engaging and interacting in ways consistent with the show's themes. Maya concludes episodes by exhorting viewers to "visit your local library like 'Maya & Miguel'".
