Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Set on a space station in an unknown solar system. The station is populated by five animal characters and one 3-eyed octopus of unknown derivation. Each episode begins with an everyday conversation or incident that grows into a predicament of some sort needing a solution. While these predicaments take place on a space station populated by animal characters and aliens from different galaxies, the issues and resolutions resonate for a preschool audience. Through comedy and zippy action, our target audience sees how the characters learn lessons for practical living such as how to: keep track of things that belong to you, practice good habits, clean up a space when you've made a mess, rebound from a failure or embarrassing incident, or resist the urge to blame others for your mistakes.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	CHICA is a five-year-old "baby" chick who spends her days with her parents in their costume shop, the Coop. The shop's one employee, Kelly, doubles as Chica's nanny and the ensemble is rounded out with Bunji, a large floppy eared rabbit and Stitches, a straw mannequin that sits in the window. Chica's parents were formerly entertainers in the vaudeville tradition and they regale the audience with stories and songs from their theatrical past. They enjoy and indulge Chica, who sometimes acts younger than her age and gets into all kinds of predicaments. Kelly uses fantasy play to transform herself, Chica, Bunji and Stitches into animated characters in another universe, who are struggling with a problem similar to the one Chica experienced in the Coop. Without fail, they find the problem can be solved and they carry that knowledge back to the Coop to use on another day.
