Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Think Big is a television series that shows a working knowledge of math, science and physics. The series shows children actively solving problems using scientific principals while combining skill and creativity. The series also demonstrates real-world applications for math, science and engineering, proving that the physical sciences can be useful, challenging and fun. Each episode presents an invent-off challenge, where teenage teams must invent a machine designed to perform a specific task in a limited amount of time, promoting creative thinking and practical skills.
