Digital Core  
Programming

Question	Response
State the average number of hours of Core Programming per week broadcast by the station on its main program stream	6.0
State the average number of hours per week of free over-the-air digital video programming broadcast by the station on other than its main program stream	0.0
State the average number of hours per week of Core Programming broadcast by the station on other than its main program stream. See 47 C.F.R. Section 73.671:	0.0
Does the Licensee provide information identifying each Core Program aired on its station, including an indication of the target child audience, to publishers of program guides as required by 47 C.F.R. Section 73.673?	Yes
Does the Licensee certify that at least 50% of the Core Programming counted toward meeting the additional programming guideline (applied to free video programming aired on other than the main Yes No program stream) did not consist of program episodes that had already aired within the previous seven days either on the station's main program stream or on another of the station's free digital program streams?	Yes

Program Title	CALLING DR. POL
Origination	Network
Days/Times Program Regularly Scheduled	SAT 7:00AM 04/04/15 - 06/28/15
Total times aired at regularly scheduled time	13
Total times aired	
Number of Preemptions	0
Number of Preemptions for other than Breaking News	
Number of Preemptions Rescheduled	
Length of Program	30 mins
Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Calling Dr. Pol is a weekly half-hour series that explores the fascinating occupation of veterinary medicine. Designed to educate and inform viewers aged 13-16 and the entire family this inspiring series invites viewers to share in the experiences of Dr. Pol. An enthusiastic and naturally-inclined and well-rounded scholar, Dr. Pol has been practicing veterinary medicine for over 35 years. Caring for more than 19,000 patients, Dr. Pol has seen it all. Specializing in large farm animals, Dr. Pol, his family and veterinary staff also care for animals of all shapes and sizes. Each week audiences will have a chance to understand the challenges and rewards of this fulfilling profession and learn that the work doesn't end at the clinic; Dr. Pol often takes his talents to the road by helping sick or injured animals on neighboring farms and ranches. With the added benefit of Dr. Pol's expert analysis and on-screen factoids, viewers will have the opportunity to learn about the biology and behavior of various domesticated animals and livestock. Unstoppable and unflappable, this Doc is a legend in the community and provides an entertaining view of the veterinary profession.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas is an educational and informative half-hour, E/I program that travels the globe to meet every kind of animal imaginable, from the familiar to the astounding. Each episode takes young viewers on a journey through the animal kingdom to learn about the lives, history, and varying adaptations that allow animals to survive and thrive in the wild. The series strives to present a wide variety of information in a number of interactive and poignant sequences to make knowledge of the animal kingdom both simpler and easier to remember. It's through this engaging information and rich visual content that allows viewers to better understand and appreciate the animal world around them.

Length of Program	30 mins
Age of Target Child Audience	13 years to 16 years
Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	<p>What an absolutely gorgeous program! If the visual is the most efficient medium for learning (and it is) then this series sends valuable education and information on a ride straight through the optic nerve to the brain. From famous cliffs in emerald Ireland to the Blue Grotto in Capri, we are taken on a tour in high definition of a planet's worth of striking natural wonders, some famous and some rarely seen. Skaftafel, Iceland, Victoria Falls, the Bay of Fundy, the "Wave" in Arizona, Machu Picchu, Waitomo, New Zealand, Mt. Bromo in Java, and more, are unveiled in a fast paced, arresting half hour of programming. Moreover, The Coolest Places on Earth is not content with merely showing these places. It explains how they came to be, when to see them best, and, thankfully, the natural laws behind their unique existence. The optics of Italy's Blue Grotto are explained as is the origin of the Ngorongo Crater, and the Mayan mysteries of Machu Picchu. But although a great amount of information is passed along, it is never pedantic. The information shared, important to the development of the 13-16-year-old target group, comes in a light narrative-the conversation tone of an awed friend. We learn why the ice caves in Skaftafel are blue, not transparent, and how the Waitomo caves in New Zealand got their name. The information is important. Without it, the visual poems of rainbows over Grand Canyon, smoking volcanic calderas, glowing worms, and time-lapsed cloud shadows would boggle the mind. The "coolest" places are sorted out by the unique facts of their being: the speed of the tides in the Bay of Fundy, the endangered cave bats in Kentucky, the Maori word origins of the Waitomo. The information, like the images, comes fast with impact, and is gone. It forces the viewer to pay attention-and there are gems if they do. For example, the narrative doesn't dwell on the information it shares that bats are the second largest order of mammals in the world. For many in the target audience (and beyond) just the fact that bats are mammals would be enough. The note that some bats are endangered enough to reroute cave visitors is a revelation to anyone who thinks of bats as the eternal vampires of the animal kingdom. There is some scary stuff to mix with the beauty: the tourist on his stomach peering over the edge of Victoria Falls; the long bungee jumps from the African bridge; the terror of being in the ice caves as they melt. For the 13-16 year-old, a little fright makes for a satisfying episode. For adults, it means a reach for the remote to DVR the images. They are worth a freeze frame.</p>

Age of Target Child Audience	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Educational institutions would love to be able to go as far and wide-and as fun-with information as On The Spot does. Schools fall into single subject tracks in middle and high school. Linking information to multiple experiences is more effective for learning-so imagine how effective a program can be when it links information across King Tut, Stonehenge, aliens, camping, biking, and food. Which is what On The Spot does. Well-researched facts on highinterest topics delivered with bright, fast, visuals will feed the interests of a broad audience group, but the approach does particularly well for the 13-16 year-old target audience. Archeology, science, and astronomy become fascinating by the clever culling of information. The programs are built with an approach that, on the surface appears to be directed for adult. But Pete Sepenuk's narrative tone and style--light and fascinated-matches and holds the attention of the target audience. And, once it holds attention, what On The Spot does very well is deliver excellent informational content. And for the target audience, it is essential that the information is not dumbed down. It is not in On The Spot. The program is peppered with breakout segments designed to be interactive, calling for the viewer to respond. These include the "Speed Round" (with ticking clock graphic), "Clinical or Cynical", and "Solved or Unsolved." The segments keep this from being passive viewing- another nice point when targeting viewers with information and education.

Total times aired at regularly scheduled time	13
Length of Program	30 mins
Age of Target Child Audience from	13 years to 16 years

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot is a series tapping knowledge across a series of subject areas: geography, art,technology, science, math, history, language, music, and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non cognitive factors for student success. These are factors that can measurably improve student achievement without specifically involving material to be tested. These include self-esteem and frames in which students see learning occurring. By removing information from the academic silos where it is generally taught and moving it, literally, to the mall, it forces a synthesis that is difficult to achieve in an academic setting. The fact that correct answers are giving by diverse ethnicities and ages, by both genders, and not by stereotypes of smart people' is essential. It means that anyone can own information. The fact that young people will see this on television in a non academic setting is also very important. Whatever the curriculum or information, knowledge becomes the star-and is demonstrated by every type of person. Target age group teens 13-16.
