Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas is an entertaining and educational half-hour program that explores the world of animal wildlife, promoting a better understanding of how various animal species live and what they need to survive. With an entertaining narrative, the series combines focused explanations of certain topics such as Animal Appetites (which explores the various diets of animals along with information about how animals catch and eat their food, how diets determine their lifestyle, etc.), Animal Antics (a hilarious look at the crazy physical antics and talents of certain species), Animal Babies (an intimate look at babies of various species, how they are born, how they are raised and the difficulties and delights of growing up), along with shows which focus solely on certain animals such as elephants, bears and monkeys. In these shows, a thorough and entertaining exploration of the specific animal takes the viewer into that animal's world as we see where it lives, how it eats, how it plays, how the family unit operates and what threatens and supports its survival. Animal Atlas also promotes responsibility toward wildlife issues by educating the viewer about endangered species and wildlife habits, as well as informing viewers how to support wildlife conservation. The program is 30 minutes in length, is regularly scheduled, airs between 7am - 10pm and is identified as an educational and informational show, targeting 13-16 year olds.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On the Spot is a series tapping knowledge across a series of subject areas: geography, art, technology, science, math, history, language, music and sports. It also addresses general cultural knowledge. The format is a series of seemingly random questions to individuals who are either of school age or adults past the age of high school graduation. There are three fundamental educational benefits to this format. First, it taps into fact retrieval in the curriculum. Second, and more important, it expands the information beyond fact retrieval. Third, and most important, it addresses what educators call non-cognitive factors for student success. These are factors that can measurably improve student achievement without specifically involving material to be tested. The fact that young people will see this on television in a non-academic setting is also very important. Whatever the curriculum or information, knowledge becomes the star - and is demonstrated by every type of person.
