Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	On The Spot boldly lays claim to a wide range of education and information topics: Transportation, Geography, Technology, Culture, Environment, Government, Money, Sports, Food, Art, History, Music, Science, Math, Health, and Language. It succeeds through the strategy of an extremely fast-paced presentation linked with eye-catching visuals, a pounding soundtrack, and an amazing array of information glued together by a genial, selfamused narration. It is a perfect match for the 21st Century learner. Despite the enormous amount of information, the tone is never salacious or sarcastic but maintains a sense of basic wry astonishment at the workings of the world. For the target audience, this is important. Too often shows appealing for attention from this group outside school rely on snarky attitudes or comfortable stereotyping. On The Spot keeps a good distance from either of those approaches. Although the series as a whole will cover the listed topics of Transportation, Geography, Technology, Culture, Environment, Government, Money, Sports, Food, Art, History, Music, Science, Math, Health, and Language, each episode concentrates the information and education into three main subgroups.
