The quiet time, always turns into a discussion that results in a dream-like adventure to solve a problem, such as overcoming shyness, making a new friend, or dealing with a bully. The adventure takes place in several nighttime dream locales where special friends help them work through the socio-emotional problem of the day. Specific approaches to managing the problem are demonstrated and practiced during the adventure, and the children return home confident, getting ample rest for today and facing their issues tomorrow.

Describe the educational and informational objective of the program and how it meets the definition of Core Programming.	Animal Atlas in has maintained a high level of educational value. It has addressed issues appropriate for both general public and the secondary classroom with a presentation that included large numbers of clips, wide ranging photography, fast-paced editing, and a non-condescending vocabulary level. The programs in the latest series of Animal Atlas happily maintain those strengths. It is differentiated from previous years by its sense of humor. Entertaining the viewer with wit and observation augments the educational integrity of its content. The level of humor, like the level of vocabulary, is most suited for middle school ages 13 to 16 with applications of topic that could extend into the higher grades. There are sound cues, visual elements and a general tone that supports the delivery of educational material in a way that is appropriate for entertainment television. The data delivered and the content communicated is absolutely educational in nature and value but one in a way that would hold the attention of the target viewer. While the program is consistently humorous, a middle school teacher could construct textbook test materials that would be applicable to Animal Atlas.
