**FEDERAL COMMUNICATIONS COMMISSION**  
**FM BROADCAST STATION CONSTRUCTION PERMIT**

Authorizing Official:

Official Mailing Address:

DREXEL UNIVERSITY  
3141 CHESTNUT STREET  
PHILADELPHIA PA 19104

Dale E. Bickel  
Senior Engineer  
Audio Division  
Media Bureau

Facility ID: 17596

Grant Date: September 27, 1994

Call Sign: WKDU

This permit expires 3:00 a.m.  
local time, March 27, 1996.

Permit File Number: BPED-19900103MC

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a bearing on this construction permit. See Report & Order, Streamlining of Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para. 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998). Pursuant to these rules, this construction permit will be subject to automatic forfeiture unless construction is complete and an application for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Name of Permittee: DREXEL UNIVERSITY

Station Location: PA-PHILADELPHIA

Frequency (MHz): 91.7

Channel: 219

Class: A

Hours of Operation: Unlimited

Transmitter: Type Accepted. See Sections 73.1660, 73.1665 and 73.1670 of the Commission's Rules.

Transmitter output power: As required to achieve authorized ERP.

Antenna type: Directional

Antenna Coordinates: North Latitude: 39 deg 57 min 36 sec  
West Longitude: 75 deg 11 min 27 sec

	Horizontally Polarized Antenna	Vertically Polarized Antenna
Effective radiated power in the Horizontal Plane (kW):	.80	.80
Height of radiation center above ground (Meters):	57	57
Height of radiation center above mean sea level (Meters):	84	84
Height of radiation center above average terrain (Meters):	47	47

Antenna structure registration number: Not Required

Overall height of antenna structure above ground: 60 Meters

Obstruction marking and lighting specifications for antenna structure:

It is to be expressly understood that the issuance of these specifications is in no way to be considered as precluding additional or modified marking or lighting as may hereafter be required under the provisions of Section 303(q) of the Communications Act of 1934, as amended.

None Required

Special operating conditions or restrictions:

- 1 The permittee/licensee must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
- 2 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee shall submit the results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components. This proof-of-performance may be accomplished using the complete full size antenna, or individual bays therefrom, mounted on a supporting structure of identical dimensions and configuration as the proposed structure, including all braces, ladders, conduits, coaxial lines, and other appurtenances; or using a carefully manufactured scale model of the entire antenna, or individual bays therefrom, mounted on an equally scaled model of the proposed supporting structure, including all appurtenances. Engineering exhibits should include a description of the antenna testing facilities and equipment employed, including appropriate photographs or sketches and a description of the testing procedures, including scale factor, measurements frequency, and equipment calibration.

Special operating conditions or restrictions:

- 3 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee shall submit an affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth.
- 4 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee/licensee shall submit an affidavit that the installation of the directional antenna system was overseen by a qualified engineer. This affidavit shall include a certification by the engineer that the antenna was installed pursuant to the manufacturer's instructions and list the qualifications of the certifying engineer.
- 5 THE RELATIVE STRENGTH OF NEITHER THE MEASURED HORIZONTALLY NOR VERTICALLY POLARIZED RADIATION COMPONENT SHALL EXCEED AT ANY AZIMUTH THE VALUE INDICATED ON THE COMPOSITE RADIATION PATTERN AUTHORIZED BY THIS CONSTRUCTION PERMIT. IN ADDITION, THE FINAL MEASURED PATTERN SHALL ACHIEVE A MAXIMUM ERP OF 0.80 KILOWATTS (RELATIVE FIELD 1.0) ONLY AT 100 DEGREES TRUE. (IF THIS ERP CANNOT BE ACHIEVED WITHOUT EXCEEDING THE AUTHORIZED COMPOSITE PATTERN, A MODIFICATION APPLICATION ON FCC FORM 340 MUST BE FILED, REVIEWED, AND GRANTED TO CHANGE THE AUTHORIZED COMPOSITE PATTERN BEFORE PROGRAM TEST OPERATIONS WILL BE PERMITTED TO COMMENCE.)  
.  
A RELATIVE FIELD STRENGTH OF 1.0 ON THE COMPOSITE PATTERN HEREIN AUTHORIZED CORRESPONDS TO THE FOLLOWING EFFECTIVE RADIATED POWER:  
0.80 KILOWATTS.  
.  
THE PRINCIPAL MINIMUM OF THE COMPOSITE RADIATION PATTERN CORRESPONDS TO:  
.  
0.028 KILOWATTS AT 235 DEGREES TRUE.

\*\*\* END OF AUTHORIZATION \*\*\*
