SALT LAKE CITY UT 84151

Arthur E. Doak
Senior Engineer
Audio Division
Media Bureau

Facility Id: 13481

Call Sign: KCPW-FM

License File Number: BMLLED-20170209ABB

Grant Date: March 17, 2017

This license expires 3:00 a.m.
local time, October 01, 2021.

This license modifies License No.: BLED-20161205ACB, granted December 8, 2016.

Subject to the provisions of the Communications Act of 1934, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this license, the licensee is hereby authorized to use and operate the radio transmitting apparatus herein described.

This license is issued on the licensee's representation that the statements contained in licensee's application are true and that the undertakings therein contained so far as they are consistent herewith, will be carried out in good faith. The licensee shall, during the term of this license, render such broadcasting service as will serve the public interest, convenience, or necessity to the full extent of the privileges herein conferred.

This license shall not vest in the licensee any right to operate the station nor any right in the use of the frequency designated in the license beyond the term hereof, nor in any other manner than authorized herein. Neither the license nor the right granted hereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934. This license is subject to the right of use or control by the Government of the United States conferred by Section 606 of the Communications Act of 1934.

Name of Licensee: WASATCH PUBLIC MEDIA

Station Location: UT-SALT LAKE CITY

Frequency (MHz): 88.3

Channel: 202

Class: C3

Hours of Operation: Unlimited

Transmitter: Type Accepted. See Sections 73.1660, 73.1665 and 73.1670 of the Commission's Rules.

Transmitter output power: .41 kW

Antenna type: Directional

Description: SCA CL-FM-2 (VRM/50 & HRM/50)-DA, 2 bays, 1 wave

Antenna Coordinates: North Latitude: 40 deg 37 min 53 sec
 West Longitude: 112 deg 07 min 50 sec

	Horizontally Polarized Antenna	Vertically Polarized Antenna
Effective radiated power in the Horizontal Plane (kW):	.45	.45
Height of radiation center above ground (Meters):	12	12
Height of radiation center above mean sea level (Meters):	2088	2088
Height of radiation center above average terrain (Meters):	416	416

Antenna structure registration number: Not Required

Overall height of antenna structure above ground: 15 Meters

Obstruction marking and lighting specifications for antenna structure:

It is to be expressly understood that the issuance of these specifications is in no way to be considered as precluding additional or modified marking or lighting as may hereafter be required under the provisions of Section 303(q) of the Communications Act of 1934, as amended.

None Required

Special operating conditions or restrictions:

- The permittee/licensee, in coordination with other users of the site, must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of the FCC guidelines.

Special operating conditions or restrictions:

- 2 Grant of this license application is conditioned on the continuous operation of the licensed facility for the twelve-month period following grant. The failure of the facility to so operate will result in the rescission of this grant, dismissal of the license application and the forfeiture of the associated construction permit pursuant to 47 C.F.R. § 73.3598(e) unless the licensee rebuts presumption that the authorized facilities were temporarily constructed.

- 3 The relative field strength of neither the measured horizontally nor vertically polarized radiation component shall exceed at any azimuth the value indicated on the composite radiation pattern authorized by Construction Permit BMPED-20160330ATI.

A relative field strength of 1.0 on the composite radiation pattern authorized by Construction Permit BMPED-20160330ATI corresponds to the following effective radiated power:

0.45 kilowatt

Principal minima and their associated field strength limits:

215 to 305 degrees True (clockwise): 0.028 kilowatt

*** END OF AUTHORIZATION ***
