Re: KTVD
0000064181
Denver, CO
Fac Id: 68581

Dear Licensee:

This refers to the above-mentioned application dated December 14, 2018, requesting special temporary authority to operate at reduced effective radiated power (ERP). You indicate that in order to conduct services for the required combiner, the KTVD facility must split its transmitter cabinets which will result in a maximum TPO of only 20.0 kW on its post-transition channel 31. Based on the maximum available TPO of 20 kW, the proposed STA will be able to operate with an ERP of 615 kW. You mentioned that the proposed temporary operation of the KTVD Channel 31 facility will produce a 48.0 dBu principal community contour which completely encompasses the community of Denver, CO.

In light of the above, special temporary authority is GRANTED pursuant to Sections 73.1560(d) and 73.1635 of the Commission's Rules. This authorization expires on **June 18, 2019**.

We wish to point out that an extension of this request must include detailed reasons and a description of efforts being taken to return the station to full power operation.

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding".
