Re: KABY-TV
0000006537
Aberdeen, SD
Fac Id: 48659

Dear Licensee:

This is in response to the above application dated November 25, 2015, for special temporary authority (STA). You indicate that KABY-TV was forced to go silent on January 11, 2015 when a structural inspection of its tower found significant deficiencies requiring demolition. KABY requests authority to operate at variance as specified herein to allow it to resume operations with a reduced power facility at an alternate site. Changes in antenna make and model, antenna height and effective radiated power (ERP) from that authorized to KABY-TV are also proposed. You also indicate that the facility changes will not cause interference to any existing facility.

After a thorough review of your technical specifications, we are persuaded that no interference is likely to occur from the proposed operation. If problems do arise, we expect them to be solved expeditiously and the Bureau reserves the right to require termination of the operation. We therefore conclude that the public interest would be served by the grant of this request.

With respect to radio frequency radiation (RFR), we expect compliance with Section 1.1307(b) of the Commission's Rules to be achieved.

Accordingly, the request for special temporary authority IS GRANTED subject to the technical parameters and conditions specified below.

Technical Parameters:

Channel: 9

Antenna Coordinates: N. Latitude: 45-28-20.1
W. Longitude: 98-30-14.1

Antenna Type: DIE, Directional
Model No. YAGI-03-1/3-L-K-1

Maximum Effective Radiated Power: 0.34 kW

Radiation Center Above Mean Sea Level: 443.5 meters

Radiation Center Above Ground Level: 44.2 meters

HAAT: 39.1 meters

Tower Registration Number: N/A

Special Conditions:

1. The grant of this construction permit is subject to the condition that, with ample time before commencing operation, you make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within your service area potentially affected by your DTV operations. Contact with state and/or local hospital associations and local governmental health care licensing authorities may prove helpful in this process. During this pre-broadcast period, you must provide all notified entities with relevant technical details of your operation, such as DTV channel, targeted on-air date, effective radiated power, antenna location, and antenna height. You are required to place in the station's public inspection file documentation of the notifications and contacts made and you may not commence operations until good faith efforts have been made to notify affected health care facilities. During this pre-broadcast period and for up to twenty (20) days after commencing operations, should you become aware of any instances of medical devices malfunctioning or that such devices are likely to malfunction due to your DTV operations, you must cooperate with the health care facility so that it is afforded a reasonable opportunity to resolve the interference problem. At such time as all provisions of this condition have been fulfilled, and either upon the expiration of twenty (20) days following commencement of operations or when all known interference problems have been resolved, whichever is later, this condition lapses.

2. This authority expires on June 2, 2016. If appropriate, a timely renewal request must be filed before the end of this period.

3. Hours of operation of this facility will be in accordance with Section 73.624(b) of the Commission's Rules

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding". The signature is written in a cursive style with a long, sweeping tail on the letter "g".

Kevin R. Harding
