Dear Licensee:

This refers to the above mentioned application dated November 30, 2016 requesting special temporary authority to operate at reduced effective radiated power (ERP). You indicate that the transmission line feeding the main antenna experienced a burn out. You mentioned that the station is currently operating at a power level of 69% (567 kW) of licensed ERP from a temporary antenna located 372m AGL at its licensed site 15 meters below its licensed main antenna.

In light of the above, special temporary authority is GRANTED pursuant to Sections 73.1560(d) and 73.1635 of the Commission's Rules. This authorization expires on June 6, 2017.

We wish to point out that an extension of this request must include detailed reasons and a description of efforts being taken to return the station to full power operation.

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding".
