Re: KVPT(TV)
0000041593
Fresno, CA
Fac Id: 69733

Dear Licensee:

This refers to the above mentioned application dated February 8, 2018 requesting Special Temporary Authority ("STA"). You indicate it is proposed to side-mount a Dielectric model TFU-8WB-1R-S230 directional antenna on the existing KVPT(TV) tower at a height of 39.9 meters above ground level and 1075 meter above mean sea level. The antenna will have a main lobe orientation of 230 degrees true and will incorporate 1.05 degrees of electrical beam tilt. The directional antenna maximum ERP will be 133.4 kW. There will be no change in the overall height of the existing structure (ASRN 1014534).

You also indicate that the licensee is filing this request for STA to ensure authority to continue to operate at variance under the parameters indicated above.

In light of the above, special temporary authority is GRANTED pursuant to Sections 73.1615 and 73.1635 of the Commission's Rules. This authorization expires on August 23, 2018.

We wish to point out that an extension of this request must include detailed reasons and a description of efforts being taken to return the station to full power operation.

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding".
