Re: Request for Tolling Waiver
KMYA-DT, Camden, AR
Facility ID No. 86534
LMS File No. 0000106831

Dear Licensee,

On March 2, 2020, LR Telecasting, LLC (LR), the licensee of KMYA-DT, Camden, Arkansas (KMYA or Station), filed the above-referenced request for waiver of the Commission's tolling provisions and tolling of the Station's construction permit expiration date. For the reasons below, we grant LR's request and toll the expiration date of KMYA's construction permit through May 31, 2020.

Background. Pursuant to Section 73.3700(b)(5) of the Commission's rules (Rules), a station that was assigned a new channel as a result of the Commission's incentive auction and repacking process may request a single extension of its construction permit deadline of up to 180 days to complete construction of its post-auction facility.¹ All subsequent requests for additional time to construct are subject to the Commission's tolling provisions of Section 73.3598(b) of the Rules.² The Commission's tolling provisions provide that a construction permit deadline may be tolled under specific circumstances such as acts of God, delays due to administrative or judicial review, or construction that is delayed by any cause of action pending before a court of competent jurisdiction relating to any necessary local, state, or federal requirement for the construction or operation of the station, including any zoning or environmental requirement.³ If a station does not qualify for tolling under these criteria, good cause may exist to waive the Commission's tolling provisions and tolling may still be warranted where the licensee can demonstrate that "rare and exceptional circumstances" prevented construction by the station's construction permit expiration date.⁴

LR requests waiver of the tolling rule and tolling of its construction permit for its post-incentive auction channel facilities through May 31, 2020. KMYA has been granted one extension and three previous waivers of the tolling rule and its construction permit was most recently tolled to March 2,

² See 47 CFR § 73.3700(b)(5)(i) citing 47 CFR § 73.3598(b).

³ *Id.*

⁴ See 1998 Biennial Regulatory Review -- Streamlining of Mass Media Applications, Rules, and Processes, Memorandum Opinion and Order, 14 FCC Rcd 17525, 17542, para. 42 (1999) (recognizing that there may be "rare and exceptional circumstances" beyond the control of the licensee that do not fall under the tolling provisions, but "which would warrant the tolling of construction time." The Commission concluded that in such "limited circumstances," it would entertain requests for waiver of its "strict tolling provisions"); *Northeast Cellular Telephone Co. v. FCC*, 897 F.2d 1164, 1166 (D.C. Cir. 1990) and *WAIT Radio v. FCC*, 418 F.2d 1153, 1159 (D.C. Cir. 1969), *cert. denied*, 409 U.S. 1072 (1972); 47 CFR § 1.3 (waiver for good cause shown).

2020.⁵ KMYA is currently operating on its post-auction channel at reduced power.⁶ LR states that it completed construction of the Station's post-auction channel facilities; however, when the transmitter was activated, the voltage readings began fluctuating anomalously. Upon investigation by the local utility company, LR reports that it was determined that the transformers on the service entrance pole serving the station needed to be replaced. LR has continued to work with the local utility company and State authorities to try to resolve this matter. Based on the foregoing, LR requests that the Commission waive its tolling rule and toll the KMYA construction permit expiration date to May 31, 2020.

Discussion. Upon review of the facts and circumstances presented, we find that sufficient circumstances exist to waive Section 73.3598(b) of the Rules and to toll the expiration date of the Station's construction permit. LR has demonstrated it did not complete construction of its post-auction channel facilities due to an ongoing issue with the power system serving the Station's transmitter site. We also find that grant of LR's waiver and tolling request is not likely to negatively impact the overall transition schedule and will not cause interference to other stations. KMYA has already ceased operation on its pre-auction channel and initiated temporary operations on its post-auction channel. To the extent some viewers are unable to receive KMYA's signal while it operates using its interim facility, we believe that LR has every incentive to ensure viewers are fully informed about the Station's transition plan. Ultimately, we conclude that the public interest will be served by grant of waiver and tolling of the Station's construction permit.

We remind LR that pursuant to the Spectrum Act, the Station is eligible for reimbursement from the TV Broadcast Relocation Fund (Fund) of costs "reasonably incurred . . . in order for the licensee to relocate its television service from one channel to the other."⁷ Additional expenses incurred, such as expenses resulting from changes in a Stations' transition plans that are not related to the post-incentive auction channel change, may not be reimbursable from the Fund.

The above facts considered, LR Telecasting, LLC's request for waiver of the Commission's tolling provisions **IS GRANTED**. The construction permit (LMS File No. 0000028486) for KMYA, Camden, Arkansas **IS TOLLED to May 31, 2020**. Grant of this tolling waiver does not permit KMYA
