Re: Request for Special Temporary
Authority
WRME-LD, Chicago, IL
Facility ID No. 128239
LMS File No. 0000153589

Dear Licensee:

This letter concerns the above-referenced request for special temporary filed July 21, 2021 (STA) by WLFM, LLC (WLL), licensee of digital low power television (LPTV) station WRME-LD, Chicago, Illinois (WRME-LD or Station). For the reasons below, we grant WLL's STA with conditions.

WRME-LD is a digital LPTV station operating on channel 6 in ATSC 3.0 format. WLL requests an STA to operate an analog FM audio carrier as an ancillary or supplementary service within Station's assigned digital channel frequencies (FM6 operations).

WLL commits that while it is operating pursuant to the STA, it will continue to make efficient use of the ATSC 3.0 video portion of the Station's signal. WLL states that the Station will provide at least one stream of synchronized video and audio programming on the ATSC 3.0 portion of the spectrum on a full time (24x7) basis. WLL represents that the Station currently originates video programming provided by Jewelry TV. WLL states that this video programming can be satisfactorily viewed on consumer receiving equipment based on the ATSC 3.0 standard.

WLL further states that the Station's ATSC 3.0 signal is configured to occupy 5.509 MHz of the Station's digital channel. WLL states that the ancillary or supplementary audio signal occupies a portion of the remaining bandwidth assigned to the Station as part of its DTV channel. WLL states further that the audio signal does not derogate the Station's obligations under the Commission's rules. WLL represents that, since the Station began operating with this configuration, it has not received any complaints about interference. Should any unexpected interference occur, WLL pledges that it will promptly take remedial action, including termination of all or part of the Station's signal, if necessary.

ACCORDINGLY, the request for special temporary of WLFM, LLC for digital LPTV station WRME-LD, Chicago, Illinois, **IS GRANTED** for a period of **six months from the date of this letter**, subject to the following conditions:

1. FM6 operations may only be conducted on 87.75 MHz.
2. This STA has been issued on a non-interference basis and may be immediately modified or terminated if the operation causes interference to any other licensed user, including but not limited to broadcast television or radio users, or if WLL fails to comply with any conditions of grant. Pursuant to section 73.1635(b) of the rules, the Video Division, without the consent of WLL, may also modify the terms of or terminate this authorization for any other reason upon written notice to WLL.

3. WRME-LD's audio and video coverage must reach similar populations.
4. WLL shall submit written reports, 90 days from the date of this letter and then again 180 days from the date of this letter, detailing any reports of interference to other licensed users it has received and any interference between WRME-LD's video and audio services that in any way limits the coverage of its video. Such reports must also include a demonstration that WRME-LD's audio and video coverage reach similar populations.
5. During the term of this STA, WRME-LD must provide at least one stream of synchronized video and audio programming on the ATSC 3.0 portion of the spectrum on a full time (24x7) basis.
6. During the term of this STA, the technical facilities of WRME-LD may not be modified.
7. During the term of this STA, the license of WRME-LD may not be assigned or transferred.

Sincerely,

/s/

Barbara A. Kreisman
Chief, Video Division
Media Bureau
