In Re: Request for Authority to Operate an  
Experimental Facility  
0000204705  
Fac Id: 10179

Licensee:

This refers to the above-referenced application, filed by KSNV, requesting authority to operate an experimental digital television facility on Channel 33 in Las Vegas, Nevada, during the annual Consumer Electronics Show (CES) and National Association of Broadcasters Show (NAB). Specifically, the applicant believes that such a public demonstration of the capabilities of the NextGen Broadcast technologies during the CES and NAB Shows will be a great benefit to the broadcasting industry and provide opportunities to enable new compatible devices and services

After a thorough review of the technical specifications, we are persuaded that no interference is likely to occur from the proposed operation. We therefore conclude that the public interest would be served by the grant of this request since the information obtained from the experiment may be valuable to the Commission's broadband initiative. However, we caution you that an experimental facility is secondary and may be summarily terminated if the operation causes interference to any other broadcast facility. Also, compliance with Section 1.1307(b) of the Commission's Rules (radio frequency radiation) is required.

Accordingly, the request for experimental authority to broadcast on Channel 33 in Las Vegas, Nevada, IS GRANTED subject to the following conditions:

1. The grant of this authorization is subject to the condition that, with ample time before commencing operation, you make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within your service area that may potentially be affected by your operations.
2. Pursuant to Section 5.207, a report will be filed with each application for renewal of this authorization, containing the information required by that Section and any other relevant information deemed appropriate by the licensees. In addition, should any unusual problems or conditions arise during the authorization period, the licensees shall inform the Commission of them at the time they occur.
3. This authorization allows operation from December 12, 2022 to April 21, 2023.

Sincerely,

/s/

Kevin R. Harding
