### Waivers/Special Conditions

- The license expiration date provided herein is tolled pursuant to 47 U.S.C. §307(C)(3) pending a final decision on the stations license renewal application. Furthermore, this license is subject to any action taken by the Commission on the renewal application.
- Pursuant to the Commission's rules, the ATSC 1.0 primary and non-primary program streams (i.e. multicast streams) identified in the underlying application as guest channels of the host station are considered as originated by the licensee. All primary and non-primary streams must operate in accordance with the operational parameters of its host station and the rules adopted by the Commission applicable to Next Gen TV stations.
- Licensee acknowledges that (1) use of MPEG-4 compression, which will be employed in connection with the hosted Antenna TV and Rewind TV 1.0 multicast streams, is not currently included in the digital ATSC 1.0 broadcast television transmission standard as defined in Section 73.682(d) of the Commission's Rules, and (2) use of MPEG-4 on its multicast streams may result in the streams being considered an "ancillary and supplementary service" subject to Section 73.624(g). The applicant also states that it understands that grant of its application does not constitute a determination by the Commission that the use of MPEG-4 in connection with the hosted multicast streams complies with the standards set forth in Section 73.682(d), and the applicant understands that, in certain circumstances, the streams could be subject to a five percent fee on the gross revenue of any "feeable" ancillary or supplementary services provided, as defined by Section 73.624(g) of the Commission's Rules. To the extent that MPEG-4 compression is used on its multicast streams, the Station may not use its multicast streams to demonstrate compliance with the Commission's children's programming requirement, see 47 CFR 73.671.
