Special Temporary Authorization (STA)  
LMS File No.: 0000243301

Dear Mr. Langham:

This is in reference to the request filed on April 9, 2024. IHM requests an extension of the STA granted on October 13, 2023, to continue operating with reduced daytime power to allow time to complete required repairs to the old 5 kW transmitter.<sup>1</sup> In support of the request, IHM stated that additional time will be required to locate and install all necessary parts in order to resume licensed operations.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and IHM may continue to operate with a reduced daytime power of 5 kW, with no change to the licensed nighttime 0.031 kW operation. IHM must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. IHM must file an electronic Restoration of Licensed Operations notice in LMS to certify the date the station resumed licensed operations per BL-20140509ANW with negligible changes to all engineering parameters (immediately after the

These log entries must be maintained for a minimum of two years as specified in 47 CFR § 73.1840(a), unless a longer retention period is requested by the staff. Periods of operation may be subject to independent verification that they in fact occurred.
