Re: KOIN
0000063056
Portland, OR
Fac Id: 35380

Dear Licensee:

This refers to the above-mentioned application dated October 24, 2018, requesting special temporary authority to operate at reduced effective radiated power (ERP). You indicate that the station has ceased operation on the lower-mounted temp antenna and now requests temporary authorization to operate with a Dielectric model TUA-04-2/8-S nondirectional temp antenna to be used for interim operation on the KOIN-DT facility's post-transition channel (25) which is mounted 37 ft higher on the tower than the temp antenna was. This will allow the KOIN-DT facility to operate at reduced power on its post-transition channel (25) using its interim antenna while the new post-transition main antenna is installed. You mentioned that the KOIN facility at reduced operation will completely encompass its community of license with the F(50,90) 48.0 dBu principal community contour and will not exceed its licensed F(50,90) 41.20 dBu pre-transition protected noise limited contour in any azimuthal direction.

In light of the above, special temporary authority is GRANTED pursuant to Sections 73.1560(d) and 73.1635 of the Commission's Rules. This authorization expires on **April 25, 2019**.

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding".
