Re: WNJU
0000067708
Linden, NJ
Fac Id: 73333

Dear Licensee:

This refers to your request dated February 5, 2019, requesting special temporary authority (STA) to operate at variance. You indicate that the instant request seeks a second STA for WNJU to operate on its pre-auction RF channel 36 from the lower antenna ("PEP96L") located at One World Trade Center with sufficient effective radiated power (ERP) to match the contour authorized in the Upper Antenna STA. You mentioned that flexibility for WNJU to alternate operations from the lower antenna to the upper antenna, and vice versa, is necessary during the repack transition to allow work on the One World Trade Center antennas and combiner systems, as well as to accommodate the needs of the other stations located at One World Trade Center.

In light of the above, special temporary authority is GRANTED pursuant to Sections 73.1560(d) and 73.1635 of the Commission's Rules. This authorization expires on **September 5, 2019**.

We wish to point out that an extension of this request must include detailed reasons and a description of efforts being taken to return the station to full power operation.

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding".
