Re: WORO-DT  
0000068232  
Fajardo, PR  
Fac Id: 73901

Dear Licensee:

This refers to the above-mentioned application dated March 4, requesting special temporary authority to operate at reduced effective radiated power (ERP). You indicate that On January 16, 2019, a new channel 13 Micronetixx antenna was hoisted and side-mounted at the height of 112 feet above ground level at center of radiation. Since then, WORO-DT has been operating with 19.5 kW of power. The antenna is currently below the licensed height. You mentioned that the Carlo tower is undergoing refurbishment and when refurbishment is completed, the tower will be able to support the WORO-DT antenna at a greater height.

In light of the above, special temporary authority is GRANTED pursuant to Sections 73.1560(d) and 73.1635 of the Commission's Rules. This authorization expires on **September 11, 2019**.

We wish to point out that an extension of this request must include detailed reasons and a description of efforts being taken to return the station to full power operation.

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding".
