Fac Id: 55049

Dear Licensee:

This refers to the above-mentioned application dated November 26, 2019 requesting special temporary authority to operate at reduced effective radiated power (ERP). You indicate that the applicant submits an updated request for Special Temporary Authority to replace and supersede the station's current STA. You mentioned that while temporary repairs have enabled the station to achieve TPO of 100%, the way the signal is currently being fed to the antenna results in an ERP of approximately 50% of the licensed power. You also indicate that the licensee is working with the tower owner and licensees of other affected stations on the tower to find a long-term solution that will enable the station to resume licensed operations.

In light of the above, special temporary authority is **GRANTED** pursuant to Sections 73.1560(d) and 73.1635 of the Commission's Rules. This authorization expires on **June 4, 2020**.

We wish to point out that an extension of this request must include detailed reasons and a description of efforts being taken to return the station to full power operation.

Sincerely,

A handwritten signature in blue ink that reads "Kevin R. Harding".
