

Extension of Experimental Authority for a Radio Broadcast Station

Audio Division, Media Bureau

Date: January 30, 2024
File Number: 0000235447
Callsign: WNPN(FM)
Facility ID Number: 163899

An extension of the Experimental Authority granted February 7, 2020 under file number 20200117AAS, is **GRANTED**, subject to all the terms and conditions specified in the original Experimental authorization. The licensee is responsible for addressing any complaints of interference that may arise.

This extended authority expires **February 7, 2025**.

Authorized by: Rodolfo F. Bonacci
Assistant Division Chief

Considerations:

WNPN may need to reduce its digital power in the upper sideband to -14dBc with respect to first adjacent station WNPW, Westerly, RI; Facility ID:768149 in order to comply with the contour nonoverlap requirement as specified in the Media Bureau's Order adopted January 27, 2010 in MM Docket No. 99-325.

Licensee must take all steps to ensure that workers and the public are not exposed to radiofrequency exposure in excess of the Commission's exposure limit.

This Experimental Authority does not supersede any non-FCC-regulated requirements applicable to the STA-authorized facility. The licensee remains solely and wholly responsible for maintaining compliance with such requirements.

Pursuant to Section 5.71(c) of the Commission's rules, a broadcast experimental authorization is issued for a one year period and may be renewed for an additional term not exceeding five years upon an adequate showing of need. Upon expiration of this experimental authority, WNPN's experimental operation using asymmetric digital sideband powers will have reached the five years renewal limit set forth in Section 5.71(c), and no further renewals of this authority will be granted.
