Considerations:

Licensee must take all steps to ensure that workers and the public are not exposed to radiofrequency exposure in excess of the Commission's exposure limit.

Fencing, warning signs, and/or other measures may be required to maintain public safety by precluding casual or inadvertent access to the tower, guy wires, antenna, transmitter, and other equipment.

This Special Temporary Authority does not supersede any non-FCC-regulated requirements applicable to the STA-authorized facility. The licensee remains solely and wholly responsible for maintaining compliance with such requirements. These can include, but are not limited to, local zoning regulations, state and local building codes and land use restrictions, environmental concerns, and other state, local, and federal requirements.

Requests for extension of STA may be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Periods of operation pursuant to this STA shall be recorded in the station's records (see 47 CFR §§ 73.1820 (AM/FM/TV), 73.877 (LPFM) and/or 74.1281 (FM translator)). The records shall include start/stop dates and times of such operation. These log entries must be maintained for a minimum of two years as specified in 47 CFR § 73.1840(a), unless a longer retention period is requested by the staff. Periods of operation may be subject to independent verification that they in fact occurred.
