IHM LICENSES, LLC
7136 S. YALE AVENUE
SUITE 501
TULSA OK 74136

Arthur E. Doak
Senior Engineer
Audio Division
Media Bureau

Facility Id: 12514

Call Sign: KYMG

License File Number: BMLH-20020425AAC

Grant Date: August 27, 2002

This license expires 3:00 a.m.
local time, February 01, 2006.

This license modifies License No.: BLH-20010711ACN Granted September
24, 2001

Subject to the provisions of the Communications Act of 1934, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this license, the licensee is hereby authorized to use and operate the radio transmitting apparatus herein described.

This license is issued on the licensee's representation that the statements contained in licensee's application are true and that the undertakings therein contained so far as they are consistent herewith, will be carried out in good faith. The licensee shall, during the term of this license, render such broadcasting service as will serve the public interest, convenience, or necessity to the full extent of the privileges herein conferred.

This license shall not vest in the licensee any right to operate the station nor any right in the use of the frequency designated in the license beyond the term hereof, nor in any other manner than authorized herein. Neither the license nor the right granted hereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934. This license is subject to the right of use or control by the Government of the United States conferred by Section 606 of the Communications Act of 1934.

Callsign: KYMG

License No.: BMLH-20020425AAC

Name of Licensee: IHM LICENSES, LLC

Station Location: AK-ANCHORAGE

Frequency (MHz): 98.9

Channel: 255

Class: C1

Hours of Operation: Unlimited

Transmitter: Type Accepted. See Sections 73.1660, 73.1665 and 73.1670 of the Commission's Rules.

Transmitter output power: 11.0 kW

Antenna type: Directional

Description: DIE DCRM6ED

Antenna Coordinates: North Latitude: 61 deg 09 min 58 sec

West Longitude: 149 deg 49 min 34 sec

	Horizontally Polarized Antenna	Vertically Polarized Antenna
Effective radiated power in the Horizontal Plane (kW):	51	51
Height of radiation center above ground (Meters):	84	84
Height of radiation center above mean sea level (Meters):	132	132
Height of radiation center above average terrain (Meters):	-46	-46

Antenna structure registration number: 1006185

Overall height of antenna structure above ground (including obstruction lighting if any) see the registration for this antenna structure.

Special operating conditions or restrictions:

- 1 The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.

Special operating conditions or restrictions:

- 2 The relative field strength of neither the measured horizontally nor vertically polarized radiation component shall exceed at any azimuth the value indicated on the composite radiation pattern authorized by Construction Permit BPH-19960111IS.

A relative field strength of 1.0 on the composite radiation pattern authorized by Construction Permit BPH-19960111IS corresponds to the following effective radiated power:

51 kilowatts

Principal minimum and its associated field strength limit:

270 degrees True: 12.8 kilowatts

- 3 The authority herein is subject to the condition that the field strength from the licensee's transmitter shall not exceed 27 mV/m as measured at the Federal Communications Commission's Anchorage monitoring station. In the event of interference to monitoring, direction finding, or related operations at the Federal Communications Commission's Anchorage monitoring station caused by either harmonic or spurious radiation, the licensee shall take such immediate corrective action as is necessary to eliminate the interference. This shall include responsibility for furnishing, installing, and adjusting transmitter filter circuits, shielding, or other corrective devices. If these measures fail to eliminate interference to FCC operations caused by the presence of the licensee's signal, or if the field strength exceeds 27 mV/m, the licensee shall immediately reduce power to the extent necessary to eliminate the interference and to comply with the 27 mV/m field strength limit. After determining this lower power level, the licensee shall immediately apply for a Special Temporary Authority (STA) and shall file an application to the Commission for the altered parameters.

*** END OF AUTHORIZATION ***
