

United States of America
FEDERAL COMMUNICATIONS COMMISSION
FM BROADCAST STATION CONSTRUCTION PERMIT

Authorizing Official:

Official Mailing Address:

FAMILY WORSHIP CENTER CHURCH, INC.
P.O. BOX 262550
BATON ROUGE LA 70826

Daniel J Fontaine
Supervisory Engineer
Audio Division
Media Bureau

Facility ID: 31171

Call Sign: WJFM

Permit File Number: BMPED-19971105IC

Grant Date: March 12, 1998

The authority granted herein has no effect on the expiration date of the underlying construction permit.

This Permit Modifies Permit No.: 960226MP

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a bearing on this construction permit. See Report & Order, Streamlining of Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para. 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998). Pursuant to these rules, this construction permit will be subject to automatic forfeiture unless construction is complete and an application for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Name of Permittee: FAMILY WORSHIP CENTER CHURCH, INC.

Station Location: LA-BATON ROUGE

Frequency (MHz): 88.5

Channel: 203

Class: C2

Hours of Operation: Unlimited

Transmitter: Type Accepted. See Sections 73.1660, 73.1665 and 73.1670 of the Commission's Rules.

Transmitter output power: As required to achieve authorized ERP.

Antenna type: Directional

Antenna Coordinates: North Latitude:	30 deg	23 min	06 sec
West Longitude:	91 deg	05 min	23 sec

	Horizontally Polarized Antenna	Vertically Polarized Antenna
Effective radiated power in the Horizontal Plane (kW):	25.5	25.5
Height of radiation center above ground (Meters):	84	84
Height of radiation center above mean sea level (Meters):	91	91
Height of radiation center above average terrain (Meters):	85	85

Antenna structure registration number: 1035493

Overall height of antenna structure above ground (including obstruction lighting if any) see the registration for this antenna structure.

Special operating conditions or restrictions:

- 1 The permittee/licensee must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
- 2 THIS GRANT IS CONDITIONED ON ANY ACTION TAKEN BY THE COURT OF APPEALS NO. 93-1320 ET AL. (D.C. CIRCUIT, MAY 14, 1993). ANY CONSTRUCTION PRIOR TO THE FINAL OUTCOME OF THIS PROCEEDING IS AT THE SOLE RISK OF THE PERMITTEE.

Special operating conditions or restrictions:

- 3 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee shall submit the results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components. This proof-of-performance may be accomplished using the complete full size antenna, or individual bays therefrom, mounted on a supporting structure of identical dimensions and configuration as the proposed structure, including all braces, ladders, conduits, coaxial lines, and other appurtenances; or using a carefully manufactured scale model of the entire antenna, or individual bays therefrom, mounted on an equally scaled model of the proposed supporting structure, including all appurtenances. Engineering exhibits should include a description of the antenna testing facilities and equipment employed, including appropriate photographs or sketches and a description of the testing procedures, including scale factor, measurements frequency, and equipment calibration.
- 4 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee shall submit an affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth.
- 5 The relative field strength of neither the measured horizontally nor vertically polarized radiation component shall exceed at an azimuth the value indicated on the composite radiation pattern authorized by this construction permit.
.
A relative field strength of 1.0 on the composite radiation pattern herein authorized corresponds to the following effective radiated power:
.
25.5 kilowatts.
.

Principal minima and their associated field strength limits:
.
115-120 degrees True: 19.5 kilowatts
240-280 degrees True: 0.970 kilowatt
- 6 BEFORE PROGRAM TESTS ARE AUTHORIZED, permittee/licensee shall submit an affidavit that the installation of the directional antenna system was overseen by a qualified engineer. This affidavit shall include a certification by the engineer that the antenna was installed pursuant to the manufacturer's instructions and list the qualifications of the certifying engineer.

*** END OF AUTHORIZATION ***
