Before PROGRAM TEST AUTHORITY is authorized by the Commission permittee shall submit documentation of compliance with this special operating condition along with the Form 302, application for license, and the request for PROGRAM TEST AUTHORITY. The permittee shall, upon completion of construction and during the equipment test period, make measurements throughout the roof and top floors of the Empire State Building to determine if there are any areas that exceed the ANSI and FCC specified guidelines for human exposure to radiofrequency radiation. If necessary, access must be restricted to these areas to prevent the exposure of humans to radiofrequency radiation in excess of the American Standards Institute Guidelines (OST Bulletin No. 65, October 1985). The restricted access must preclude casual or inadvertent access, and must include warning signs at appropriate intervals which describe the nature of the hazard. Any areas found to exceed the recommended guidelines must be clearly marked with appropriate visual warning signs.
