Call Sign: KQNM

Permit File Number: BMP-20080407ACO

Grant Date: August 15, 2008

The authority granted herein has no effect on the expiration date of the underlying construction permit.

This permit modifies permit no.: BP-20060424ADE

Subject to the provisions of the Communications Act of 1934, as amended, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this permit, the permittee is hereby authorized to construct the radio transmitting apparatus herein described. Installation and adjustment of equipment not specifically set forth herein shall be in accordance with representations contained in the permittee's application for construction permit except for such modifications as are presently permitted, without application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a bearing on this construction permit. See Report & Order, Streamlining of Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para. 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998). Pursuant to these rules, this construction permit will be subject to automatic forfeiture unless construction is complete and an application for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections 73.1610 and 73.1620 of the Commission's Rules.

Special operating conditions or restrictions:

- 1 The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
- 2 Permittee shall install a type accepted transmitter, or submit application (FCC Form 301) along with data prescribed in Section 73.1660(b) should non-type accepted transmitter be proposed.
- 3 Before program tests are authorized, sufficient data shall be submitted to show that adequate filters, traps and other equipment has been installed and adjusted to prevent interaction, intermodulation and/or generation of spurious radiation products which may be caused by common usage of the same antenna system by Stations KKJY (Facility ID: 4705), KKIM (Facility ID: 25524), KRKE (Facility ID: 65257), and there shall be filed with the license application copies of a firm agreement entered into by the three stations involved clearly fixing the responsibility of each with regard to the installation and maintenance of such equipment. In addition, field observations shall be made to determine whether spurious emissions exist and any objectionable problems resulting therefrom shall be eliminated. Following construction, and prior to authorization of program test under this grant, Stations KKJY, KKIM, and KRKE shall each measure antenna or common point resistance and submit FCC Form 302 as application notifying the return to direct measurement of power.
- 4 Licensee shall be responsible for satisfying all reasonable complaints of blanketing interference within the 1 V/m contour as required by Section 73.88 of the Commission's rules.

Special operating conditions or restrictions:

- 5 Before program test authority is authorized by the Commission:
sufficient radiofrequency (RF) electromagnetic field measurements
taken at the tower fence shall be submitted to show that the new power
level RF radiation is in compliance with the American National
Standards Institute Guidelines (OET Bulletin No. 65. August 1997); or
a fence must be erected at such distances and in such a manner as to
prevent the exposure human exposure to radiofrequency electromagnetic
fields in excess of the FCC Guidelines (OET Bulletin No. 65. Edition
97-01, August 1997). The fence must be of a type which will preclude
casual or inadvertent access, and must include warning signs at
appropriate intervals which describe the nature of the hazard.
Permittee shall submit documentation of compliance with this special
operating condition along with the Form 302, application for license
and the request for program test authority.
- 6 Ground system consists of 120 equally spaced, buried, copper radials
about the base of the tower, between 57.6 meters and 100.6 meters in
length plus 120 interspersed radials between 18.3 meters and 30.5
meters in length.
