**INFORMAL OBJECTION**

Portland Russian Media Center (“PRMC”), via Station Manager Eduard Rusu, here files Informal Objection (“Objection”) against Bustos Media Holdings, LLC (“Bustos”) concerning application File No. 0000210227 for license to cover of construction permit BNPFT-20180427ABZ for FM translator station K288HD at Beaverton, Oregon. PRMC is a party of interest because it is licensee of KXRU-LP, co-channel to K288HD in the Portland metropolitan area. This Objection is being filed because the site of K288HD was visited February 6, 2023 and was not seen to be constructed by Bustos even though the application for license to cover was submitted. Because the permit expired February 5, 2023 without construction, the pending license to cover should be denied, and the underlying permit BNPFT-20180427ABZ should be canceled.

**I. BACKGROUND**

Bustos' history of filing for new FM translator construction permits extends back to 2017, with some controversy. BNPFT-20171212AAB was an FM translator application filed proposing to wedge a 2 watt translator in Portland in between two minimum-spaced (24 km) co-channel LPFM facilities serving Portland. Another FM translator application, BNPFT-20170802AEY, was proposed to be co-channel to another Portland metro LPFM. Both were petitioned concerning untenable interference and ultimately canceled. A second round of FM translators were applied for in an AM cross-service translator filing window for new translators in 2018. Bustos filed for two translators to be co-channel to two nearby Portland LPFM stations. With these filings, Bustos first attempted obfuscate the intent of their channel selections by submitting short forms that designated channels on the first adjacent channels (that were not available) to these LPFM stations -- BNPFT-20180427ABZ for channel 289 (105.7 FM), and BNPFT-20180427ABY for Channel 235 (94.9 FM) -- to not raise LPFM petitioning red flags. Upon submitting long-forms, Bustos subtly changed the channels, respectively, to Channel 288 (105.5 FM) via BNPFT-20180427ABZ, and Channel 236 (95.1 FM) via BNPFT-20180427ABY. BNPFT-20180427ABY was later moved to another channel to prevent dismissal upon an interference contest from a co-channel LPFM. BNPFT-20180427ABZ (translator K288HD, *the subject of this Objection*) maintained, modifying to a new CP site in Beaverton, Oregon owned by SBA Towers (ASRN 1280117), with attempt to dodge interference claims to co-channel KXRU-LP, but leaving the LPFM locked-in to a short-spacing.

Construction permit for K288HD was granted February 5, 2020, hence with an expiration date of February 5, 2023. At the time of CP grant, PRMC contacted SBA site marketing manager, Joe Rozanc, who indicated that K288HD's designated tower "will not work for FM single Bay antenna" as Bustos had proposed (See Attachment A). The structure is a stealth canister flagpole tower of 30" in diameter and is incompatible with the proposed antenna Bustos had obtained a construction permit to use. Three years later, the day after the construction permit expired, on February 6, 2023, I visited the site of the Bustos construction permit and found the facility unconstructed.

## **II. K288HD DOES NOT APPEAR TO BE CONSTRUCTED**

On February 6th 2023 at approximately 10:15 AM, I, Eduard Rusu, traveled to the parking lot of Coin Laundromat located at the intersection of Allen and Hall Boulevard in Beaverton, Oregon. Upon my arrival, I noticed that the free standing cellular telephone tower, which was built in a stealth style, had not changed in appearance from any previous days I observed it, nor any visible attachments were added to the structure.<sup>1</sup> Upon tuning to 105.5 MHz, I heard a faint mix of interference from distant stations believed to be KUKN-FM and K288FT. However, within the FCC's Licensing and Management System, Bustos submitted an application for a license to cover for a new translator K288HD. There is no visual indication that the FM translator station has been built, nor any signal similar to KXET-AM's programming was able to be

---

<sup>1</sup> The Nicom BKY3P antenna, indicated on License to Cover, AFN 0000210227, was not seen.

picked-up near the tower structure on 105.5 MHz.<sup>2</sup> Photographs of the construction permit tower location area and other information is included in Attachment B. Audio from a car radio comparing KXET-AM and the audio from 105.5 MHz can be heard via this link: [https://youtube.com/shorts/adqhTNZ\\_jWk?feature=share](https://youtube.com/shorts/adqhTNZ_jWk?feature=share). A declaration indicating this information is all true to the best of my knowledge is included in Attachment C.

### III. CONCLUSION

Due to the evidence provided here, it appears Bustos did not construct FM translator K288HD by the expiration date of the associated construction permit BNPFT-20180427ABZ. The application for license to cover should be denied, and the construction permit should be canceled.

Hello Ed,

My name is Eduard Rusu and I am the director of a KXRU-LP in Portland, OR.

It has come to my attention that another local radio broadcaster, Bustos Media, has submitted an application to the FCC to install a radio broadcast FM antenna on your tower with registration 1280117. This is a stealth tower and on the application Bustos shows a type of the antenna that would not fit into the stealth enclosure in any way. (picture attached). I was just curious, did he contact you to get some sort of assurance that he will be able to install his antenna on your tower in case if the FCC approves his application?

Thanks for your time in advance,

--

Joe,

Did we get any inquiries from Bustos Media for the above referenced site. Thanks.

Ed,

Below is the email from our site marketing manager regarding the above referenced site. As you can see from the email below, our site will not work for an FM single bay antenna.

Regards,

Ed

Yes I did – This tower will not work for FM single Bay antenna

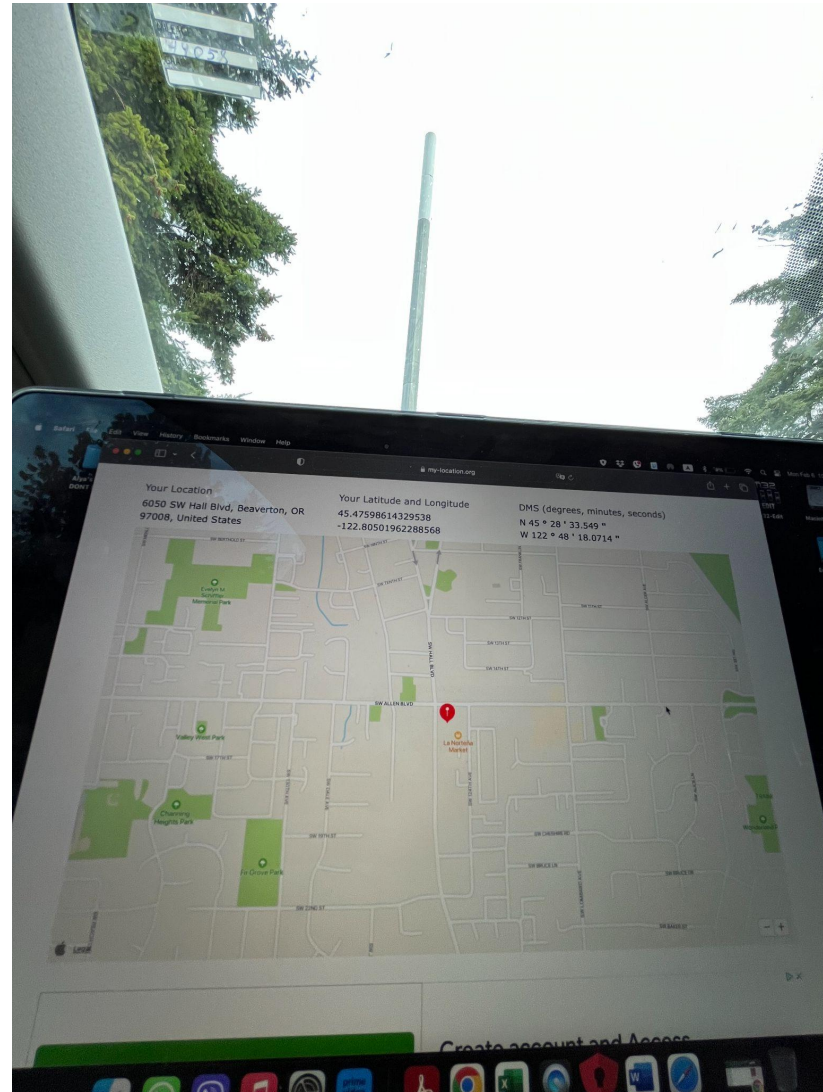

This is a Stealth Canister Flagpole Tower – Canister is 30" in diameter and they want to install a single bay antenna (50" x 72" x 3")

I can reach out to them again today

(619) 671 - 9500 PRODUCTS BUNDLE

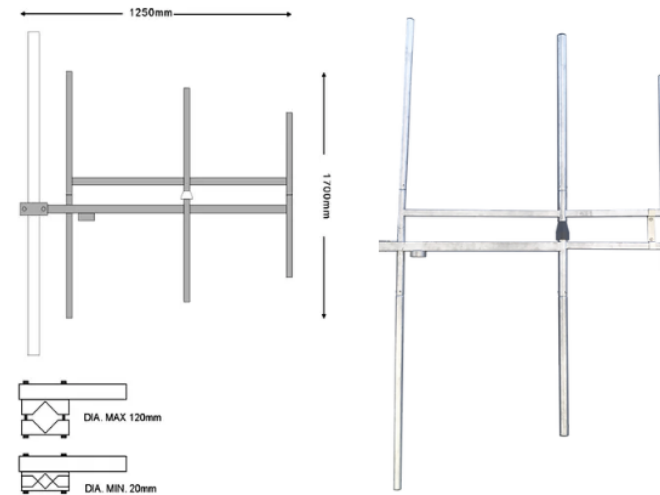

#### TECHNICAL SPECIFICATIONS

Antenna Type: 3 element directional antenna  
Front-to-Back Ratio: 18 dB  
Frequency Range: 87.5 - 108 MHz  
Polarization: vertical, horizontal or 45 degree slant  
Gain: 4.5 dB (referred to half-wave dipole)  
Bandwidth: 20 MHz  
VSWR: < 1.2 max.  
H Plane: 150 degrees  
V Plane: 70 degrees  
Impedance: 50 Ohms  
Connector: N type (1 kw) - EIA 7/8 (2 kw)  
Power Rating: 2000 Watts max.  
Wind Load: 48.4 Lbs (22 kg)  
Wind Velocity: 130 mph (208 km/h) max  
Wind Surface: 2.0 ft<sup>2</sup> (0.19 m<sup>2</sup>)  
Lightning Protection: all parts grounded  
Material: (external) stainless steel  
Mounting: from 2" to 4"  
Weight: 20 Lbs (9 kg)  
Average Dimensions: 50"x72"x3"  
(1250x1700x60mm)  
Packing: 53"x19"x4" (1300x480x100mm)

#### ANTENNAS > BKY3P

**Overview:** Medium Power Portable Broadband FM Directional Antenna

Broadband 88-108 MHz band  
Linear Polarization 3-element  
High gain, Stainless Steel Construction

## **ATTACHMENT C**

### **SWORN DECLARATION OF EDUARD RUSU**

Eduard Rusu deposes and states as follows:

I am the station manager for KXRU-LP. Attached with this Declaration is a complete and accurate transcript of my email exchange with officials at SBA Towers concerning the proposal of Bustos Media Holdings to locate the antenna for an FM translator station at their tower, ASRN 1280117.

I visited the site of the K288HD construction permit, 45 28' 33.6" N, 122 48' 16.5" W, on February 6, 2023 and did not witness the facility being constructed or on the air. The information presented in this Informal Objection is true and correct to the best of my knowledge.

The foregoing statement is true and correct to the best of my personal knowledge and is given under the penalty of perjury

Eduard Rusu
