FM Translator Station K241CS, Channel 241, Phoenix, Arizona	)	File No. BLFT-20170126ABP
	)	

To: Chief, Audio Division, Media Bureau

**COMPLAINT**

Barna Broadcasting, LLC (“Barna”), the licensee of full-power radio station KSWG(FM), Channel 242C3 (96.3 MHz), Wickenburg, Arizona, Facility ID No. 11216, by its attorney, hereby submits this Complaint pursuant to Section 74.1203(a) of the Commission’s Rules. Barna requests immediate Commission action to discontinue interference to *bona fide* regular listeners of KSWG(FM) from first adjacent-channel FM translator K241CS, Channel 241 (96.1 MHz), Phoenix, Arizona, Facility ID No. 156046, licensed to Sewanee Phoenix License, LLC (“Sewanee Phoenix”).

According to FCC records, Sewanee Phoenix completed construction of new FM Translator facilities for K241CS as authorized by Construction Permit File No. BMPFT-20161031ADH, and filed a license to cover application on February 6, 2017. *See* FCC File No. BLFT-20170206ACK.

Following the commencement of operations by K241CS, Barna began hearing from dozens of listeners complaining of interference from the 96.1 MHz signal to the regularly-received signal of KSWG(FM). Barna promptly brought these interference concerns to the attention of Sewanee Phoenix and sought informal resolution of the matter through the local

contact provided by Sewanee Phoenix. Such informal attempts have not resolved the interference from K241CS, which such interference continues to negatively impact regular listeners of KSWG. Seven attested interference complaints from the FM translator operation on 96.1 MHz to the receipt of the KSWG(FM) signal are submitted here at Exhibit 1. 1/ Barna hereby confirms that the complaining listeners are not employees of or principals of the licensee or any affiliated companies. Thus, these listener complainants are “disinterested” parties. 2/

Section 74.1203(a) of the Commission’s Rules provides in part:

An authorized FM translator or booster station will not be permitted to continue to operate if it causes any actual interference to: ... (3) The direct reception by the public of the off-the-air signals of any authorized broadcast station. . . . Interference will be considered to occur whenever reception of a regularly used signal is impaired by the signals radiated by the FM translator or booster station, regardless of the quality of such reception, the strength of the signal so used, or the channel on which the protected signal is transmitted....

The Commission has explained: “The FM translator rules strictly prohibit interference by these secondary service stations. Accordingly, ‘when convinced that a complaint or complaints of uncorrected interference are valid . . . [the Commission] will direct . . . [the FM translator or booster station] to discontinue operation.’” 3/ As documented here, *bona fide*

---

1/ As noted, many more complaints of interference also have been received from KSWG listeners.

2/ See *Association for Community Education, Inc.*, 19 FCC Rcd 12682 at n.37 (2004) (complainant should be “disinterested,” that is, “a person or entity without a legal stake in the outcome of the translator station licensing proceeding”). Moreover, Section 74.1203(a) “places no geographic or temporal limitation on complaints.” *Id.* at ¶ 15.

3/ *Id.* (citing *Amendment of Part 74 of the Commission’s Rules Concerning FM Translator Stations*, 5 FCC Rcd 7212, 7230 (1990), *modified*, 6 FCC Rcd 2334 (1991), *recon. den.*, 8 FCC Rcd 5093 (1993)).

regular listeners of KSWG(FM) have complained of interference from K241CS. If the licensee of K241CS does not voluntarily cease the translator's operation, the Commission should take immediate action to terminate K241CS's operational authority pursuant to Section 74.1203(a) of the Commission's Rules.

Respectfully submitted,

**BARNA BROADCASTING, LLC**

**EXHIBIT 1**

I am a regular listener of radio station KSWG(FM), 96.3 MHz, Wickenburg, Arizona,  
from the following location(s): ✓

North Phoenix, Glendale, Peoria, and Scottsdale-  
(Home)                      (Work)

I receive a listenable KSWG signal on my radio at the above location(s) and I am a regular listener of KSWG at the above location. However, my reception of the KSWG signal is now being interfered with by another signal bleeding over from 96.1 MHz. I wish to continue to regularly listen to KSWG at the above location without being subject to interference caused by this interfering signal. Other than being a regular listener of KSWG, I am not connected with or employed by the licensee of KSWG. I understand that this statement may be filed with the Federal Communications Commission to protect the KSWG signal and state under penalty of perjury that this statement is true and accurate.
